| | Note generali | Rev. version of 7 tutorials given at the Networking 2002 Conference, Pisa, Italy, May 2002. |
| | Nota di bibliografia | Includes bibliographical references and index. |
| | Nota di contenuto | Peer to Peer: Peering into the Future -- Mobile Computing Middleware -- Network Security in the Multicast Framework -- Categorizing Computing Assets According to Communication Patterns -- Remarks on Ad Hoc Networking -- Communications through Virtual Technologies -- A Tutorial on Optical Networks. |
| | Sommario/riassunto | This book presents the revised version of seven tutorials given at the NETWORKING 2002 Conference in Pisa, Italy in May 2002. The lecturers present a coherent view of the core issues in the following areas: - |

peer-to-peer computing and communications - mobile computing middleware - network security in the multicast framework - categorizing computing assets according to communication patterns - remarks on ad-hoc networking - communication through virtual technologies - optical networks.
