

1. Record Nr.	UNISA996466161603316
Titolo	Transactions on Aspect-Oriented Software Development II [[electronic resource]] : Focus: AOP Systems, Software and Middleware / / edited by Awais Rashid, Mehmet Aksit
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2006
ISBN	3-540-48891-X
Edizione	[1st ed. 2006.]
Descrizione fisica	1 online resource (IX, 292 p.)
Collana	Transactions on Aspect-Oriented Software Development, , 1864-3027 ; ; 4242
Disciplina	005.1
Soggetti	Computer programming Software engineering Programming languages (Electronic computers) Computer simulation Management information systems Computer science Programming Techniques Software Engineering Programming Languages, Compilers, Interpreters Software Engineering/Programming and Operating Systems Simulation and Modeling Management of Computing and Information Systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	On Horizontal Specification Architectures and Their Aspect-Oriented Implementations -- On Horizontal Specification Architectures and Their Aspect-Oriented Implementations -- A Framework for Policy Driven Auto-adaptive Systems Using Dynamic Framed Aspects -- Focus: AOP Systems, Software and Middleware -- Editorial: AOP Systems, Software and Middleware -- Aspect-Oriented Development of Crosscutting Features in Distributed, Heterogeneous Systems -- Shakeins: Nonintrusive Aspects for Middleware Frameworks -- Run-Time and Atomic Weaving of Distributed Aspects -- TOSKANA: A Toolkit for

Operating System Kernel Aspects -- Lean and Efficient System Software
Product Lines: Where Aspects Beat Objects -- Providing Configurable
QoS Management in Real-Time Systems with QoS Aspect Packages.

Sommario/riassunto

The LNCS Journal on Transactions on Aspect-Oriented Software Development is devoted to all facets of aspect-oriented software development (AOSD) techniques in the context of all phases of the software life cycle, from requirements and design to implementation, maintenance and evolution. The focus of the journal is on approaches for systematic identification, modularization, representation and composition of crosscutting concerns, i.e., the aspects and evaluation of such approaches and their impact on improving quality attributes of software systems. This volume, the second in the Transactions on Aspect-Oriented Software Development series, presents 2 regular revised papers, a guest editors' introduction, and 6 papers in a special section that have been through a careful peer reviewing process by the journal's Editorial Board. Besides a wide range of topics from software design to implementation of aspect-oriented languages, the 6 papers of the special section concentrate on AOP systems, software and middleware.
