

1. Record Nr.	UNISA996466170603316
Titolo	Combinatorial and algorithmic aspects of networking : 4th workshop, CAAN 2007, Halifax, Canada, August 14, 2007, revised papers / / edited by Pawel Pralat and Jeannette Janssen
Pubbl/distr/stampa	Berlin, Germany ; ; New York, New York : , : Springer, , [2007] ©2007
ISBN	3-540-77294-4
Edizione	[1st ed. 2007.]
Descrizione fisica	1 online resource (VIII, 152 p.)
Collana	Computer Communication Networks and Telecommunications ; ; 4852
Disciplina	004.6
Soggetti	Computer networks Algorithms Internet
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Invited Lectures (Abstracts) -- Luck vs. Skill -- Valiant Load Balancing, Benes Networks and Resilient Backbone Design -- Contributed Papers -- Valiant Load Balancing, Capacity Provisioning and Resilient Backbone Design -- Cleaning Random d-Regular Graphs with Brushes Using a Degree-Greedy Algorithm -- Nonadaptive Selfish Routing with Online Demands -- Vertex Pursuit Games in Stochastic Network Models -- Preemptive Scheduling on Selfish Machines -- Selfish Routing and Path Coloring in All-Optical Networks -- A Worst-Case Time Upper Bound for Counting the Number of Independent Sets -- Improving the Efficiency of Helsgaun's Lin-Kernighan Heuristic for the Symmetric TSP -- Combinatorial Algorithms for Listing Paths in Minimal Change Order -- Improving Topological Routing in N2R Networks.
Sommario/riassunto	The advent of the Internet has opened up a wealth of applications, but also given rise to a host of new problems. Many of those problems have led to - citing new research directions in mathematics and theoretical computer science, especially in the areas of combinatorics and algorithms. The Fourth Workshop on Combinatorial and Algorithmic Aspects of Networking (CAAN 2007) was organized to be a place where the latest research developments on all aspects of networking could be

presented. The topics covered were diverse, with talks on strategies for searching in networks, for cleaning networks of unwanted - trusers, on different routing strategies, and on scheduling and load balancing. The workshop started with an invited lecture by Peter Winkler of Dartmouth College, who gave a general talk on a topic related to probability, a concept central to network modeling and managing. The afternoon opened with a short invited talk by Alejandro Lopez-Ortiz, who gave an overview of various issues in designing resilient backbone networks. CAAN 2007 took place on August 14, 2007, at Dalhousie University in Halifax, Nova Scotia, Canada, co-located with the Workshop on Algorithms and Data Structures (WADS 2007). Three previous CAAN workshops were held in Chester, UK (CAAN 2006), Waterloo, Ontario, Canada (CAAN 2005), and in Ban?, Alberta, Canada (CAAN 2004), respectively.
