

1. Record Nr.	UNISA996466194203316
Titolo	Logic-Based Program Synthesis and Transformation [[electronic resource] ] : 27th International Symposium, LOPSTR 2017, Namur, Belgium, October 10-12, 2017, Revised Selected Papers / / edited by Fabio Fioravanti, John P. Gallagher
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-94460-6
Edizione	[1st ed. 2018.]
Descrizione fisica	1 online resource (XVI, 341 p. 59 illus.)
Collana	Theoretical Computer Science and General Issues, , 2512-2029 ; ; 10855
Disciplina	005.115
Soggetti	Computer science Software engineering Compilers (Computer programs) Computer programming Artificial intelligence Machine theory Computer Science Logic and Foundations of Programming Software Engineering Compilers and Interpreters Programming Techniques Artificial Intelligence Formal Languages and Automata Theory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Analysis -- Program development -- Term rewriting and CHR -- Theory -- Verification.
Sommario/riassunto	This book constitutes the thoroughly refereed post-conference proceedings of the 27th International Symposium on Logic-Based Program Synthesis and Transformation, LOPSTR 2017, held in Namur, Belgium, in October 2017. The 19 revised full papers were carefully reviewed and selected from 29 submissions. In addition to the 19

revised papers, this volume includes the abstracts of the invited talks by three outstanding speakers: Sumit Gulwani, Marieke Huisman, and Grigore Rosu. The aim of the LOPSTR series is to stimulate and promote international research and collaboration on logic-based program development. LOPSTR is open to contributions in all aspects of logic-based program development, all stages of the software life cycle, and issues of both programming-in-the-small and programming-in-the-large. LOPSTR traditionally solicits contributions, in any language paradigm, in the areas of synthesis, specification, transformation, analysis and verification, specialization, testing and certification, composition, program/model manipulation, optimization, transformational techniques in SE, inversion, applications, and tools.
