1. Record Nr.   UNISA996466196703316

   Titolo   SOFSEM 2002: Theory and Practice of Informatics [[electronic resource]]
                        : 29th Conference on Current Trends in Theory and Practice of
                        Informatics, Milovy, Czech Republic, November 22-29, 2002,
                        Proceedings / / edited by William I. Grosky, Frantisek Plasil

   Pubbl/distr/stampa   Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer,
                        , 2002

   ISBN   3-540-36137-5

   Edizione   [1st ed. 2002.]

   Descrizione fisica   1 online resource (X, 294 p.)

   Collana   Lecture Notes in Computer Science, , 0302-9743 ; ; 2540

   Disciplina   004

   Soggetti   Computers
                        Software engineering
                        Computer communication systems
                        Multimedia information systems
                        Optical data processing
                        Theory of Computation
                        Software Engineering
                        Computer Communication Networks
                        Computation by Abstract Devices
                        Multimedia Information Systems
                        Computer Imaging, Vision, Pattern Recognition and Graphics

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Bibliographic Level Mode of Issuance: Monograph

   Nota di bibliografia Includes bibliographical references at the end of each chapters and
                        index.

   Nota di contenuto   INVITED TALKS -- Conformance Testing Techniques for Timed Systems
                        -- Counter-Constrained Finite State Machines: A New Model for
                        Component Protocols with Resource-Dependencies -- Equivalence-
                        Checking with Infinite-State Systems: Techniques and Results -- On
                        Functions and Types: A Tutorial -- Database Support for Multisource
                        Multiresolution Scientific Data -- Semantic Annotation and Indexing of
                        News and Sports Videos -- Multimedia Presentations Databases
                        (Extended Abstract) -- Interactive Indexing and Retrieval of Multimedia
                        Content -- A Model-Based Approach to Semantic-Based Retrieval of

Visual Information -- Bipolarity in Possibilistic Logic and Fuzzy Rules (Extended Abstract) -- PANEL SESSION -- Data Management Challenges for GRID Computing -- CONTRIBUTED PAPERS -- Hungarian Speech Synthesis Using a Phase Exact HNM Approach -- Modelling Resource Transitions in Constraint-Based Scheduling -- A Specification Framework for Real-Time Scheduling -- String Transformation for n-Dimensional Image Compression -- Validation and Decomposition of Partially Occluded Images -- Solving Conflicts of Agent Knowledge States in Multiagent Systems -- Specification and Verification of Secure Business Transaction Systems -- Agent-Oriented Model of Simulated Evolution -- The Reconstruction of Some 3D Convex Polyominoes from Orthogonal Projections -- The Complexity of Probabilistic versus Quantum Finite Automata -- Do We Need Liveness? – Approximation of Liveness Properties by Safety Properties.

Sommario/riassunto	Forthe29thtime,SOFSEM(SOFtwareSEMinar)washeld.Havingtransformed over the years from a local event to a fully international conference, the c- temporary SOFSEM is a mix of a winter school and a conference striving for multidisciplinarity in computer science, accompaniedby workshops dedicated to a narrow ?eld (this year multimedia and softcomputing) and a student forum. This volume constitutes the proceedings of SOFSEM 2002 held in Milovy, Czech Republic, November 22–29, 2002. This year, 23 papers were submitted from 11 countries. The selection of the 11 best papers accepted by the Program Committee was based on their contribution to the state of the art, technical soundness, clarity of presentation, and relevance of bibliography. The Steering Committee supported by the Advisory Board recommended 12 invited talks focusedonthefollowingkeytopicareas: distributedandparallelsystems,system design and testing, databases and information systems, and fundamentals. SOFSEM is the result of considerable e?ort by a number of people. It is our pleasure to record our thanks to the Advisory Board for its support, to the Steering Committee for its general guidance, and to the Organizing Committee for making SOFSEM 2002 happen. It has been an honor for us to work with the members of the Program Committee and other referees who devoted a lot of e?ort to reviewing the submitted papers.
