Titolo	Bioinformatics and Biomedical Engineering [[electronic resource] ] : 5th International Work-Conference, IWBBIO 2017, Granada, Spain, April 26–28, 2017, Proceedings, Part I // edited by Ignacio Rojas, Francisco Ortuño
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-56148-0
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (XXXIII, 673 p. 250 illus.)
Collana	Lecture Notes in Bioinformatics ; ; 10208
Disciplina	572.80285
Soggetti	Bioinformatics Health informatics Data mining Optical data processing Computer graphics Computer organization Computational Biology/Bioinformatics Health Informatics Data Mining and Knowledge Discovery Image Processing and Computer Vision Computer Graphics Computer Systems Organization and Communication Networks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Advances in Computational Intelligence for Critical Care -- Bioinformatics for Healthcare and Diseases -- Biomedical Engineering -- Biomedical Image Analysis -- Biomedical Signal Analysis -- Biomedicine -- Challenges Representing Large-scale Biological Data -- Computational Genomics -- Computational Proteomics -- Computational Systems for Modeling Biological Processes -- Data Driven Biology - New Tools, Techniques and Resources -- eHealth -- High-throughput Bioinformatic Tools for Genomics -- Oncological Big

Data and New Mathematical Tools -- Smart Sensor and Sensor-Network Architectures -- Time Lapse Experiments and Multivariate Biostatistics.

Sommario/riassunto

This two volume set LNBI 10208 and LNBI 10209 constitutes the proceedings of the 5th International Work-Conference on Bioinformatics and Biomedical Engineering, IWBBIO 2017, held in Granada, Spain, in April 2017. The 122 papers presented were carefully reviewed and selected from 309 submissions. The scope of the conference spans the following areas: advances in computational intelligence for critical care; bioinformatics for healthcare and diseases; biomedical engineering; biomedical image analysis; biomedical signal analysis; biomedicine; challenges representing large-scale biological data; computational genomics; computational proteomics; computational systems for modeling biological processes; data driven biology - new tools, techniques and resources; eHealth; high-throughput bioinformatic tools for genomics; oncological big data and new mathematical tools; smart sensor and sensor-network architectures; time lapse experiments and multivariate biostatistics.

## Sommario/riassunto

Despite setbacks and cutbacks, Canada leads the world in northern and Aboriginal communications. This book provides a comprehensive survey of communications in the circumpolar region, focusing on the Canadian Arctic and sub-Arctic but also looking at the circumpolar North (Alaska, Siberia, Greenland, and the Nordic/Saami nations). Radio, television, magazines, newspapers, and web sites are all covered. As technologies and access improve, Aboriginal people are increasingly taking control of their own representation and consolidating their presence in northern media. Alia concludes that Canada will maintain its leadership in northern communications in the years ahead, given the topic's far-reaching importance and international context.
