1. Record Nr.   UNISA996466207703316

   Titolo   Implementation and Application of Automata [[electronic resource]] :
                       23rd International Conference, CIAA 2018, Charlottetown, PE, Canada,
                       July 30 – August 2, 2018, Proceedings / / edited by Cezar Câmpeanu

   Pubbl/distr/stampa Cham : , : Springer International Publishing : , : Imprint : Springer, ,
                       2018

   ISBN   3-319-94812-1

   Edizione   [1st ed. 2018.]

   Descrizione fisica 1 online resource (XI, 339 p. 65 illus.)

   Collana   Theoretical Computer Science and General Issues, , 2512-2029 ; ;
                       10977

   Disciplina   511.3

   Soggetti   Computer science
                       Machine theory
                       Artificial intelligence—Data processing
                       Information storage and retrieval systems
                       Computer Science Logic and Foundations of Programming
                       Formal Languages and Automata Theory
                       Data Science
                       Information Storage and Retrieval

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Nota di contenuto   State complexity of automata -- Implementations of automata and
                       experiments -- Enhanced regular expressions -- Complexity analysis.

   Sommario/riassunto This book constitutes the proceedings of the 23rd International
                       Conference on Implementation and Application of Automata, CIAA
                       2018, held in Charlottetown, PE, Canada, in July/August 2018. The 23
                       regular papers presented in this book together with 4 invited papers
                       were carefully reviewed and selected from 39 initial submissions. The
                       topics of the papers include state complexity of automata,
                       implementations of automata and experiments, enhanced regular
                       expressions, and complexity analysis.
