| 1. Record Nr. | UNISA996466212203316 |
| Titolo | Ad-Hoc, Mobile and Wireless Networks [[electronic resource]] : 9th International Conference, ADHOC-NOW 2010, Edmonton, AB, Canada, August 20-22, 2010, Proceedings // edited by Ioanis Nikolaidis, Kui Wu |
| Pubbl/distr/stampa | Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2010 |
| ISBN | 1-280-38815-3 9786613566072 3-642-14785-2 |
| Edizione | [1st ed. 2010.] |
| Descrizione fisica | 1 online resource (X, 222 p. 86 illus.) |
| Collana | Computer Communication Networks and Telecommunications ; ; 6288 |
| Disciplina | 004.6 |
| Soggetti | Computer communication systems Software engineering Computer programming Application software Algorithms Computer Communication Networks Software Engineering/Programming and Operating Systems Programming Techniques Information Systems Applications (incl. Internet) Algorithm Analysis and Problem Complexity Software Engineering |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Bibliographic Level Mode of Issuance: Monograph |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | Simulation-Based Comparison of Three Wireless Multicast Routing Protocols: MOST, MOLSR and SMOLR -- An Energy Efficient Power Control Protocol for Ad Hoc Networks Using Directional Antennas -- On Minimizing the Sum of Sensor Movements for Barrier Coverage of a Line Segment -- On Alarm Protocol in Wireless Sensor Networks -- Revisiting Clustering Based Efficient Broadcast for Wireless Multihop Networks with Memory Limited Nodes -- Locally Proactive Routing |

Protocols -- Coverage-Adaptive Random Walks for Fast Sensory Data Collection -- Joint Scheduling and Spectrum Allocation in Wireless Networks with Frequency-Agile Radios -- Towards Modeling Realistic Mobility for Performance Evaluations in MANET -- An Efficient Clusterhead Placement for Hybrid Sensor Networks -- RaceTrack: An Approximation Algorithm for the Mobile Sink Routing Problem -- Data Aggregation Integrity Based on Homomorphic Primitives in Sensor Networks -- iCCA-MAP Versus MCL and Dual MCL: Comparison of Mobile Node Localization Algorithms -- ADNL-Angle: Accurate Distributed Node Localization for Wireless Sensor Networks with Angle of Arrival Information -- Planning and Deploying Long Distance Wireless Sensor Networks: The Integration of Simulation and Experimentation -- A Generalized Framework for Integrated Vehicle Traffic and Wireless Network Simulation.

Sommario/riassunto

For more than a decade, ad hoc wireless networks have galvanized the interest and sparked the imagination of researchers. Such networks consist of a set of nodes equipped with wireless interfaces and they are designed to form self-organizing and spontaneous networks. They are usually multi-hop in nature, collectively forwarding and processing data to accomplish an application task. In addition, their topologies can be highly dynamic due to the potential mobility of the nodes. All these properties, in isolation and combination, pose a plethora of research challenges as well as new application opportunities. The International Conference on Ad-Hoc Networks and Wireless (ADHOC-NOW) serves as one of the premier venues for researchers and industrial practitioners to exchange ideas in this exciting area. Following previous ADHOC-NOW conferences in Murcia, Spain (2009), Sophia Antipolis, France (2008), Morelia, Mexico (2007), Ottawa, Canada (2006), Cancun, Mexico (2005), Vancouver, Canada (2004), Montreal, Canada (2003), and Toronto, Canada (2002), the ninth ADHOC-NOW conference took place at the University of Alberta in Edmonton, Canada, during August 20–22, 2010. As the capital city of the Province of Alberta, Edmonton is a cultural, governmental, and educational center and offers year-round world-class festivals, including the Edmonton International Fringe Theatre Festival. Edmonton is also home to North America's largest indoor shopping mall, the West Edmonton Mall. The summer in Edmonton is particularly joyful and has mild temperature and long, sunny daytime.
