1. Record Nr. UNISA996466214003316

Titolo	Understanding the Brain Function and Emotions [[electronic resource]] : 8th International Work-Conference on the Interplay Between Natural and Artificial Computation, IWINAC 2019, Almería, Spain, June 3–7, 2019, Proceedings, Part I / / edited by José Manuel Ferrández Vicente, José Ramón Álvarez-Sánchez, Félix de la Paz López, Javier Toledo Moreo, Hojjat Adeli
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-19591-0
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (XXIII, 432 p. 188 illus., 122 illus. in color.)
Collana	Theoretical Computer Science and General Issues, , 2512-2029 ; ; 11486
Disciplina	610.28563
Soggetti	Computer science Artificial intelligence Image processing—Digital techniques Computer vision Computer networks Theory of Computation Artificial Intelligence Computer Imaging, Vision, Pattern Recognition and Graphics Computer Communication Networks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Sommario/riassunto	The two volume set LNCS 11486 and 11487 constitutes the proceedings of the International Work-Conference on the Interplay Between Natural and Artificial Computation, IWINAC 2019, held in Almería, Spain,, in June 2019. The total of 103 contributions was carefully reviewed and selected from 190 submissions during two rounds of reviewing and improvement. The papers are organized in two volumes, one on understanding the brain function and emotions, addressing topics such as new tools for analyzing neural data, or

detection emotional states, or interfacing with physical systems. The second volume deals with bioinspired systems and biomedical applications to machine learning and contains papers related bioinspired programming strategies and all the contributions oriented to the computational solutions to engineering problems in different applications domains, as biomedical systems, or big data solutions.
