1. Record Nr.   UNISA996466219203316

   Titolo   Field-Programmable Logic and Applications: Reconfigurable Computing
                       Is Going Mainstream [[electronic resource]] : Reconfigurable Computing
                       Is Going Mainstream / / edited by Manfred Glesner, Peter Zipf, Michel
                       Renovell

   Pubbl/distr/stampa Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer,
                       , 2002

   ISBN   3-540-46117-5

   Edizione   [1st ed. 2002.]

   Descrizione fisica 1 online resource (XLIV, 1192 p. 330 illus.)

   Collana   Lecture Notes in Computer Science, , 0302-9743 ; ; 2438

   Disciplina   621.39/5

   Soggetti   Architecture, Computer
                       Software engineering
                       Logic design
                       Computer memory systems
                       Microprocessors
                       Computer communication systems
                       Computer System Implementation
                       Software Engineering/Programming and Operating Systems
                       Logic Design
                       Memory Structures
                       Processor Architectures
                       Computer Communication Networks

   Lingua di pubblicazione Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Note generali   Bibliographic Level Mode of Issuance: Monograph

   Nota di bibliografia Includes bibliographical references and index.

   Nota di contenuto   Keynote Address -- Trends -- Rapid Prototyping -- FPGA Synthesis --
                       Custom Computing Engines -- DSP Applications 1 -- Reconfigurable
                       Fabrics -- Dynamic Reconfiguration 1 -- DSP Applications 2 -- Routing
                       & Placement -- Dynamic Reconfiguration 2 -- Power Estimation --
                       Synthesis Issues -- Keynote Address -- Communication Applications 1
                       -- New Technologies -- Reconfigurable Architectures --
                       Communication Applications 2 -- Multimedia Applications -- FPGA-
                       based Arithmetic 1 -- Reconfigurable Processors -- Testing & Fault-
