1. Record Nr.   UNISA996466231803316

Titolo   Advanced information systems engineering : 14th International Conference, CAiSE 2002 Toronto, Canada, May 27-31, 2002, proceedings / / Anne Banks Pidduck [and three others] (editors)

Pubbl/distr/stampa   Berlin ; ; Heidelberg ; ; New York : , : Springer, , [2002]
©2002

ISBN   3-540-47961-9

Edizione   [1st ed. 2002.]

Descrizione fisica   1 online resource (XIV, 782 p.)

Collana   Lecture Notes in Computer Science, , 0302-9743 ; ; 2348

Disciplina   005.73

Soggetti   Data structures (Computer science)

Lingua di pubblicazione   Inglese

Formato   Materiale a stampa

Livello bibliografico   Monografia

Note generali   Bibliographic Level Mode of Issuance: Monograph

Nota di bibliografia   Includes bibliographical references and index.

Nota di contenuto   Invited Presentations -- The Grand Challenge in Information Technology and the Illusion of Validity -- Metadata and Cooperative Knowledge Management -- Ontology-Driven Conceptual Modeling -- Metadata and Cooperative Knowledge Management -- Web Component: A Substrate for Web Service Reuse and Composition -- Developing Web Applications -- Designing Web-Based Systems in Social Context: A Goal and Scenario Based Approach -- A State Machine Based Approach for a Process Driven Development of Web-Applications -- Knowledge Management -- Supporting Dimension Updates in an OLAP Server -- The COMET Metamodel for Temporal Data Warehouses -- Exploring RDF for Expertise Matching within an Organizational Memory -- Deployment Issues -- Describing and Communicating Software Architecture in Practice: Observations on Stakeholders and Rationale -- The Individual Deployment of Systems Development Methodologies -- Supporting the Deployment of Object-Oriented Frameworks -- Semantics of Information -- A Conceptual Modeling Approach to Semantic Document Retrieval -- Multidimensional Semistructured Data: Representing Context-Dependent Information on the Web -- The Role of Semantic Relevance in Dynamic User Community Management and the Formulation of Recommendations -- System Qualities -- Can We Ever Build Survivable Systems from COTS Components? -- Towards a Data Model for Quality Management Web

Sommario/riassunto TheexplosivegrowthoftheInternetandtheWebhavecreatedanever-

growing demand for information systems, and ever-growing challenges for Information Systems Engineering. The series of Conferences on Advanced Information S- tems Engineering (CAiSE) was launched in Scandinavia by Janis Bubenko and Arne Solvberg in 1989, became an important European conference, and was held annually in major European sites throughout the 1990s. Now, in its 14th year, CAiSEwasheldforthe?rsttimeoutsideEurope,showcasinginternational researchon information systems and their engineering. Not surprisingly, this year the conference enjoyed unprecedented attention. In total, the conference received 173 paper submissions, the highest number ever for a CAiSE conference. Of those, 42 were accepted as regular papers and 26 as short (poster) papers. In addition, the conference received 12 proposals for workshops of which 8 were approved, while 4 tutorials were selected from 15 submissions. The technical program was put together by an international committee of 81 experts. In total, 505 reviews were submitted, with every member of the committeecontributing.

Decisionsonallsubmissionswerereachedataprogram committee meeting in Toronto on January 26-27,2002. Workshop and tutorial proposals were handled separately by committees chaired by Patrick Martin (workshops), and Jarek Gryz and Richard Paige (tutorials). We wish to extend a great "THANK YOU!" to all members of the program and organizing committees for their volunteer contributions of time and exp- tise. The fact that so many busy (and famous!) people took the trouble to help uswiththeorganizationofthisconferenceandtheformationofitstechnicalp-gram speaks well for the future of CAiSE and the ?eld of Information Systems Engineering.
