Pseudorandom Number Generator for EPC Gen2 Tags -- A Note on a Fatal Error of Optimized LFC Private Information Retrieval Scheme and Its Corrected Results -- Reliable Food Traceability Using RFID Tagging -- Lightweight Cryptography and DPA Countermeasures: A Survey -- Securing the Use of RFID-Enabled Banknotes -- Increasing Privacy Threats in the Cyberspace: The Case of Italian E-Passports -- RLCPS Preface -- SPAKE: A Single-Party Public-Key Authenticated Key Exchange Protocol for Contact-Less Applications -- A Secure and Privacy-Preserving Targeted Ad-System -- Cryptographic Cloud Storage -- Extending IPsec for Efficient Remote Attestation -- Open Mobile Alliance Secure Content Exchange: Introducing Key Management Constructs and Protocols for Compromise-Resilient Easing of DRM Restrictions -- How to Evaluate the Security of Real-Life Cryptographic Protocols? -- WECSR Preface -- Preaching What We Practice: Teaching Ethical Decision-Making to Computer Security Professionals -- A Case Study on Measuring Statistical Data in the Tor Anonymity Network -- A Case Study in Ethical Decision Making Regarding Remote Mitigation of Botnets -- Ethical Proactive Threat Research -- A Framework for Understanding and Applying Ethical Principles in Network and Security Research -- Ethical Concerns in Computer Security and Privacy Research Involving Human Subjects -- Ethical Guidelines for Computer Security Researchers: "Be Reasonable".

Sommario/riassunto	This volume contains the workshopproceedings of the accompanying workshops of the 14th Financial Cryptograpy and Data Security International Conference 2010, held on Tenerife, Canary Islands, Spain, January 25-28, 2010. FinancialCryptographyandData Securityis a majorinternationalforumfor research, advanced development, education, exploration, and debate regarding information assurance, with a speci?c focus on commercial contexts. The c- ference covers all aspects of securing transactions and systems and especially encourages original work focusing on both fundamental and applied real-world deployments on all aspects surrounding commerce security. Three workshops were co-located with FC 2010: the Workshop on Real-Life CryptographicProtocolsandStandardization(RLCPS), theWorkshoponEthics in Computer Security Research (WECSR), and the Workshop on Lightweight Cryptography for Resource-Constrained Devices (WLC). Intimate and colorful by tradition, the high-quality program was not the only attraction of FC. In the past, FC conferences have been held in highly research-synergistic locations such as Tobago, Anguilla, Dominica, Key West, Guadelupe, Bermuda, the Grand Cayman, and Cozumel Mexico. 2010 was the ?rst year that the conference was held on European soil, in the Spanish Canary Islands, in Atlantic waters, a few miles across Morocco. Over 100 researchers from more than 20 countries were in attendance.

	Sommario/riassunto	The number of manuscripts produced in the Indian sub-continent is astounding and is the result of a massive enterprise that was carried out over a vast geographical area and over a vast stretch of time. Focusing mainly on areas of Northern India and Nepal between 800 to 1300 CE and on manuscripts containing Sanskrit texts, the present study investigates a fundamental and so far rarely studied aspect of manuscript production: visual organisation. Scribes adopted a variety of visual strategies to distinguish one text from another and to differentiate the various sections within a single text (chapters, sub-chapters, etc.). Their repertoire includes the use of space(s) on the folio, the adoption of different writing styles, the inclusion of symbols

of various kind, the application of colours ('rubrication'), or a combination of all these. This study includes a description of these various strategies and an analysis of their different implementations across the selected geographical areas. It sheds light on how manuscripts were produced, as well as on some aspects of their employment in ritual contexts, in different areas of India and Nepal.
