Sommario/riassunto

Cultures of Representation is the first book to explore the cinematic portrayal of disability in films from across the globe. Contributors explore classic and recent works from Belgium, France, Germany, India, Italy, Iran, Japan, Korea, Mexico, Netherlands, Russia, Senegal, and Spain, along with a pair of globally resonant Anglophone films. Anchored by David T. Mitchell and Sharon L. Snyder's coauthored essay on global disability-film festivals, the volume's content spans from 1950 to today, addressing socially disabling forces rendered visible in the representation of physical, developmental, cognitive, and psychiatric disabilities. Essays emphasize well-known global figures, directors, and industries – from Temple Grandin to Pedro Almodóvar, from Akira Kurosawa to Bollywood – while also shining a light on films from less frequently studied cultural locations such as those portrayed in the Iranian and Korean New Waves. Whether covering postwar Italy, postcolonial Senegal, or twenty-first century Russia, the essays in this volume will appeal to scholars, undergraduates, and general readers alike.

Sommario/riassunto

This book constitutes the thoroughly refereed post-conference proceedings of the 12th Brazilian Symposium on Formal Methods, SBMF 2009, held in Gramado, Brazil, in August 2009 -- co-located with SAST 2009, the Brazilian Workshop on Systematic and Automated Software Testing. The 20 revised full papers presented together with 3 invited papers were carefully selected from numerous submissions during two rounds of reviewing and improvement. The papers are devoted to the dissemination of the development and use of formal methods for the design and verification of computational systems. The symposium provided an opportunity for researchers with a broad range of interests in formal methods for developing computing systems and software to discuss recent developments in this field.
