1. Record Nr.   UNISA996466304803316

   Titolo   Transactions on Computational Science XXXIV [[electronic resource] /] /
                    edited by Marina L. Gavrilova, C.J. Kenneth Tan

   Pubbl/distr/stampa   Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer,
                        , 2019

   ISBN   3-662-59958-9

   Edizione   [1st ed. 2019.]

   Descrizione fisica   1 online resource (XI, 137 p. 75 illus., 32 illus. in color.)

   Collana   Transactions on Computational Science, , 1866-4733 ; ; 11820

   Disciplina   006.3

   Soggetti   Machine learning
                    Application software
                    Software engineering
                    Data structures (Computer science)
                    Architecture, Computer
                    Machine Learning
                    Information Systems Applications (incl. Internet)
                    Software Engineering/Programming and Operating Systems
                    Data Structures and Information Theory
                    Computer System Implementation

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Nota di contenuto   Machine Learning in Hybrid Environment for Information Identification
                       with Remotely Sensed Image Data -- Clustering-Based Aggregation of
                       High-Utility Patterns from Unknown Multi-Database -- A Study of
                       Three Different Approaches to Point Placement on a Line in an Inexact
                       Model -- Cinolib: A Generic Programming Header Only C++ Library for
                       Processing Polygonal and Polyhedral Meshes -- Trust Computation in
                       VANET Cloud -- Received Power Exploration of Cooperative WSN
                       Deployed in Adjustable Antenna Height Environment -- A Built-in
                       Circuit for Self-Reconguring Mesh-Connected Processor Arrays with
                       Spares on Diagonal.

   Sommario/riassunto   The LNCS journal Transactions on Computational Science reflects
                        recent developments in the field of Computational Science, conceiving
                        the field not as a mere ancillary science but rather as an innovative

approach supporting many other scientific disciplines. The journal focuses on original high-quality research in the realm of computational science in parallel and distributed environments, encompassing the facilitating theoretical foundations and the applications of large-scale computations and massive data processing. It addresses researchers and practitioners in areas ranging from aerospace to biochemistry, from electronics to geosciences, from mathematics to software architecture, presenting verifiable computational methods, findings, and solutions, and enabling industrial users to apply techniques of leading-edge, large-scale, high performance computational methods. This, the 34th issue of the Transactions on Computational Science, contains seven in-depth papers focusing on research on data analytics using machine learning and pattern recognition, with applications in wireless networks, databases, and remotely sensed data. .
