

1. Record Nr.	UNISA996466345803316
Titolo	Web Information Systems -- WISE 2004 [[electronic resource]] : 5th International Conference on Web Information Systems Engineering, Brisbane, Australia, November 22-24, 2004, Proceedings // edited by Xiaofang Zhou, Stanley Su, Mike P. Papazoglou, Maria E. Orlowska, Keith G. Jeffery
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2004
ISBN	3-540-30480-0
Edizione	[1st ed. 2004.]
Descrizione fisica	1 online resource (XVII, 745 p.)
Collana	Lecture Notes in Computer Science, , 0302-9743 ; ; 3306
Disciplina	620.7
Soggetti	Computer programming Computer science Application software Database management Information storage and retrieval Artificial intelligence Programming Techniques Popular Computer Science Information Systems Applications (incl. Internet) Database Management Information Storage and Retrieval Artificial Intelligence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Keynote Papers -- What Does It Mean to "Measure Performance"? -- Trustworthy Computing -- Towards Next Generation Web Information Retrieval -- Session 1: Web Information System Modelling -- Making XML an Information Modeling Language -- Web Information Exchange Diagrams for UML -- A User Service Oriented Method to Model Web Information Systems -- The Power of Media Types -- Scenario Matching Using Functional Substitutability in Web Services -- Session 2:

Payment and Security -- Three Kinds of E-wallets for a NetPay Micro-Payment System -- Information Assurance in Federated Identity Management: Experimentations and Issues -- Query-Log Based Authority Analysis for Web Information Search -- XML Signature Extensibility Using Custom Transforms -- Session 3: Information Extraction -- Extraction of Cognitively-Significant Place Names and Regions from Web-Based Physical Proximity Co-occurrences -- Query Based Chinese Phrase Extraction for Site Search -- Extracting Business Rules from Web Product Descriptions -- Wrapping HTML Tables into XML -- Vague Event-Based Related News Detection -- Session 4: Advanced Applications -- A Web Based Platform for the Design of Administrative Reference Process Models -- Technologies for Online Issuing Service of Documents -- AutoDBT: A Framework for Automatic Testing of Web Database Applications -- Web-Based Surgical Simulation of Craniofacial CT Data -- Applications of Data Mining in Web Services -- Session 5: Performance Issues -- A Framework for the Relational Implementation of Tree Algebra to Retrieve Structured Document Fragments -- An Efficient OLAP Query Processing Technique Using Measure Attribute Indexes -- Preserving Aggregation Semantic Constraints in XML Document Update -- Session 6: Linkage Analysis and Document Clustering -- Exploiting PageRank at Different Block Level -- Multi-type Features Based Web Document Clustering -- Clustering Transactional XML Data with Semantically-Enriched Content and Structural Features -- Session 7: Web Caching and Content Analysis -- Schema-Less, Semantics-Based Change Detection for XML Documents -- Discovering Minimal Infrequent Structures from XML Documents -- Temporal Web Page Summarization -- Web Pre-fetching Using Adaptive Weight Hybrid-Order Markov Model -- Text Categorization Based on Domain Ontology -- Session 8: XML Query Processing -- AC-Tree: An Adaptive Structural Join Index -- Approximate Query Answering for a Heterogeneous XML Document Base -- Optimization of XML Transformations Using Template Specialization -- Materialized View Maintenance for XML Documents -- An Efficient Algorithm for Clustering XML Schemas -- Session 9: Web Search and Personalization -- Google's "I'm Feeling Lucky", Truly a Gamble? -- A Knowledge-Based Framework for the Rapid Development of Conversational Recommenders -- Categorizing Web Information on Subject with Statistical Language Modeling -- Optimizing Web Search Using Spreading Activation on the Clickthrough Data -- AVATAR: An Advanced Multi-agent Recommender System of Personalized TV Contents by Semantic Reasoning -- An Online Adaptive Method for Personalization of Search Engines -- Session 10: Workflow Management and Enterprise Information Systems -- Management of Serviceflow in a Flexible Way -- Recovery Nets: Towards Self-Adaptive Workflow Systems -- Structuring the Development of Inter-organizational Systems -- Contemplating Open Source Enterprise Systems -- Managing Changes to Virtual Enterprises on the Semantic Web -- Session 11: Business Processes -- A Reflective Approach to Keeping Business Characteristics in Business-End Service Composition -- A Domain Framework for Representation of Web System Impacts -- Knowledge Management in the Business Process Negotiation -- A Web Service Oriented Integration Approach for Enterprise and Business-to-Business Applications -- Session 12: Deep Web and Dynamic Content -- A Two-Phase Sampling Technique to Improve the Accuracy of Text Similarities in the Categorisation of Hidden Web Databases -- Capturing Web Dynamics by Regular Approximation -- Deep Crawling in the Semantic Web: In Search of Deep Knowledge -- Session 13: Web Information System Design -- Designing Localized Web Sites -- Scaling

Dynamic Web Content Provision Using Elapsed-Time-Based Content Degradation -- Component Reconfiguration Tool for Software Product Lines with XML Technology -- Generating Multidimensional Schemata from Relational Aggregation Queries -- Semantics Based Conformance Assessment of ebXML Business Processes -- Session 14: Ontology and Applications -- Usage Scenarios and Goals for Ontology Definition Metamodel -- XML Schema Matching Based on Incremental Ontology Update -- Spam Mail Filtering System Using Semantic Enrichment -- Integrating Ontology Knowledge into a Query Algebra for Multimedia Meta Objects -- Session 15: Multimedia, User Interfaces, and Languages -- Toward Semantic Web Services for Multimedia Adaptation -- A Lightweight Encryption Algorithm for Mobile Online Multimedia Devices -- Aspect-ARM: An Aspect-Oriented Active Rule System for Heterogeneous Multimedia Information -- Opportunistic Search with Semantic Fisheye Views -- A Graphical XQuery Language Using Nested Windows -- Grouping in MetaXQuery -- Session 16: Peer-to-Peer and Grid Systems -- Search in Unstructured Peer-to-Peer Networks -- A Formal Model for the Grid Security Infrastructure -- SPSS: A Case of Semantic Peer-to-Peer Search System -- An Efficient Broadcast Algorithm Based on Connected Dominating Set in Unstructured Peer-to-Peer Network -- A Time-Based Peer Trust Evaluation in P2P E-commerce Environments -- Fault Resilience of Structured P2P Systems.

Sommario/riassunto

We have described the development of a new micro-payment system, NetPay, featuring different ways of managing electronic money, or e-coins. NetPay provides an off-line, anonymous protocol that supports high-volume, low-cost electronic transactions over the Internet. We developed three kinds of e-wallets to manage coins in a NetPay-based system: a sever-side e-wallet allowing multiple computer access to coins; a client-side e-wallet allowing customer PC management of the e-coins, and a cookie-based e-wallet cache to improve performance of the client-side e-wallet communication overhead. Experiences to date with NetPay prototypes have demonstrated it provides an effective micro-payment strategy and customers welcome the ability to manage their electronic coins in different ways.
