1. Record Nr. UNISA996466361803316 Big Data Benchmarks, Performance Optimization, and Emerging Titolo Hardware [[electronic resource]]: 6th Workshop, BPOE 2015, Kohala, HI, USA, August 31 - September 4, 2015. Revised Selected Papers // edited by Jianfeng Zhan, Rui Han, Roberto V. Zicari Pubbl/distr/stampa Cham:,: Springer International Publishing:,: Imprint: Springer,, 2016 **ISBN** 3-319-29006-1 Edizione [1st ed. 2016.] Descrizione fisica 1 online resource (X, 147 p. 53 illus. in color.) Collana Information Systems and Applications, incl. Internet/Web, and HCI;; 9495 004 Disciplina Soggetti Database management Data mining Information storage and retrieval Computer communication systems Application software Algorithms Database Management Data Mining and Knowledge Discovery Information Storage and Retrieval **Computer Communication Networks** Information Systems Applications (incl. Internet) Algorithm Analysis and Problem Complexity Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Note generali Bibliographic Level Mode of Issuance: Monograph Nota di contenuto Benchmarking -- Benchmarking and Workload Characterization --Performance Optimization and Evaluation -- Emerging Hardware. This book constitutes the thoroughly revised selected papers of the 6th Sommario/riassunto workshop on Big Data Benchmarks, Performance Optimization, and Emerging Hardware, BPOE 2015, held in Kohala Coast, HI, USA, in August/September 2015 as satellite event of VLDB 2015, the 41st

International Conference on Very Large Data Bases. The 8 papers

presented were carefully reviewed and selected from 10 submissions. The workshop focuses on architecture and system support for big data systems, aiming at bringing researchers and practitioners from data management, architecture, and systems research communities together to discuss the research issues at the intersection of these areas. This book also invites three papers from several industrial partners, including two papers describing tools used in system benchmarking and monitoring and one paper discussing principles and methodologies in existing big data benchmarks.
