Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Diophantine Equations and Approximation -- Diophantine Approximation and its Applications -- Roth's Theorem -- The Subspace Theorem of W.M. Schmidt -- Heights on Abelian Varieties -- D. Mumford's "A Remark on Mordell's Conjecture" -- Ample Line Bundles and Intersection Theory -- The Product Theorem -- Geometric Part of Faltings's Proof -- Faltings's Version of Siegel's Lemma -- Arithmetic Part of Faltings's Proof -- Points of Degree d on Curves over Number Fields -- "The" General Case of S. Lang's Conjecture (after Faltings).
Sommario/riassunto	The 13 chapters of this book centre around the proof of Theorem 1 of Faltings' paper "Diophantine approximation on abelian varieties", Ann. Math.133 (1991) and together give an approach to the proof that is accessible to Ph.D-level students in number theory and algebraic geometry. Each chapter is based on an instructional lecture given by its author at a special conference for graduate students, on the topic of Faltings' paper.

Sommario/riassunto	This book provides the quintessential information needed to

understand the financial side of the retirement planning coin. You'll begin by learning about the various plan types employers may offer their employees. Topics related to compliance testing will be thoroughly discussed as well as strategies used to legally shift benefits in favor of highly compensated employees (HCEs). However, some employers do not sponsor a plan. In this instance, retirement savers will need to understand the options available within the world of individual retirement accounts (IRAs). This book is not intended to provide investment advice, but rather to guide how different retirement savings vehicles function and how they can be effectively deployed. Many financial professionals find that their clients ask questions about all aspects of their financial life. For this reason, this book also discusses non-investment-related topics such as housing options, Social Security planning, Medicare planning, and a few other basic insurance-based issues faced by all retirees.
