1. Record Nr. UNISA996466379003316

Autore	Kalashnikov Vladimir
Titolo	Stability problems for stochastic models : proceedings of the 9th international seminar held in Varna, Bulgaria, May 13-19, 1985 / / Vladimir Kalashnikov, Boyan Penkov, Vladimir Zolotarev
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer-Verlag, , [1987] ©1987
ISBN	3-540-47394-7
Edizione	[1st ed. 1987.]
Descrizione fisica	1 online resource (VIII, 224 p.)
Collana	Lecture Notes in Mathematics, , 0075-8434 ; ; 1233
Classificazione	60-06 62-06
Disciplina	003.76
Soggetti	Stochastic models
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	The estimation of the rate of convergence in the integral limit theorem in the Euclidean motion group -- Contribution to the analytic theory of linear forms of independent random variables -- ?p-strictly stable laws and estimation of their parameters -- The method of metric distances in the problem of estimation of the deviation from the exponential distribution -- The accuracy of the normal approximation to the distribution of the sum of a random number of independent random variables -- Mixtures of probability distributions -- Some limit theorems for summability methods of I.I.D.Random variables -- Properties of mode of spectral positive stable distributions -- Two characterizations using records -- On orthogonal-series estimators for probability distributions -- Estimates of the deviation between the exponential and new classes of bivariate distributions -- On the difference between distributions of sums and maxima -- On the inequalities of Berry-Esseen and V.M. Zolotarev -- Some fixed point theorems probabilistic metric spaces -- The asymptotic bias in a deviation of a location model -- Cramer's decomposition theorem within the continuation of distribution functions -- An asymptotically most Bias-Robust invariant estimator of location -- Characterizing the distributions of the random vectors X 1, X 2, X 3 by the distribution of the statistic (X 1–X 3, X 2–X 3) -- On stability estimates of Cramer's

theorem -- On the estimation of moments of regenerative cycles in a general closed central-server queueing network -- On F-processes and their applications -- On some properties of ideal metrics of order ? -- On ?-independence of sample mean and sample variance.
