

1. Record Nr.	UNISA996466379103316
Autore	Bramson Maury
Titolo	Stability of Queueing Networks [[electronic resource]] : École d'Été de Probabilités de Saint-Flour XXXVI-2006 / / by Maury Bramson
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2008
ISBN	3-540-68896-X
Edizione	[1st ed. 2008.]
Descrizione fisica	1 online resource (VIII, 198 p. 20 illus.)
Collana	École d'Été de Probabilités de Saint-Flour, , 0721-5363
Disciplina	519.2
Soggetti	Probabilities Operations research Management science Computer organization Probability Theory and Stochastic Processes Operations Research, Management Science Computer Systems Organization and Communication Networks
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The Classical Networks -- Instability of Subcritical Queueing Networks -- Stability of Queueing Networks -- Applications and Some Further Theory.
Sommario/riassunto	Queueing networks constitute a large family of stochastic models, involving jobs that enter a network, compete for service, and eventually leave the network upon completion of service. Since the early 1990s, substantial attention has been devoted to the question of when such networks are stable. This volume presents a summary of such work. Emphasis is placed on the use of fluid models in showing stability, and on examples of queueing networks that are unstable even when the arrival rate is less than the service rate. The material of this volume is based on a series of nine lectures given at the Saint-Flour Probability Summer School 2006. Lectures were also given by Alice Guionnet and Steffen Lauritzen.
