

1. Record Nr.	UNISA996466382903316
Titolo	Conference on the numerical solution of differential equations, Dundee, 1973 // edited by G.A. Watson
Pubbl/distr/stampa	Berlin, Germany : , : Springer, , [1974] ©1974
ISBN	3-540-37914-2
Edizione	[1st ed. 1974.]
Descrizione fisica	1 online resource (CCXL, 228 p.)
Collana	Lecture Notes in Mathematics, , 0075-8434 ; ; 363
Disciplina	515.35
Soggetti	Differential equations - Numerical solutions
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	A conjugate gradient approach to nonlinear elliptic boundary value problems in irregular regions -- Good approximation by splines with variable knots. II -- Conforming and nonconforming finite element methods for solving the plate problem -- Discretization and chained approximation -- Recent developments of the hopscotch idea -- The development of software for solving ordinary differential equations -- Boundary conditions for hyperbolic differential equations -- Nonlinear methods for stiff systems of ordinary differential equations -- Curved elements in the finite element method -- The design of difference schemes for studying physical instabilities -- Variable order variable step finite difference methods for nonlinear boundary value problems -- Cyclic finite-difference methods for ordinary differential equations -- The dimension of piecewise polynomial spaces, and one-sided approximation -- The comparative efficiency of certain finite element and finite difference methods for a hyperbolic problem -- Spline-galerkin methods for initial-value problems with constant coefficients -- On the accelerated SSOR method for solving elliptic boundary value problems -- Algebraic-geometry foundations for finite-element computation -- Spline-galerkin methods for initial-value problems with variable coefficients -- Constrained variational principles and penalty function methods in finite element analysis -- Finite element methods for parabolic equations.
