

1. Record Nr.	UNISA996466385803316
Titolo	Transformation Groups, Poznan 1985 : proceedings of a symposium held in Poznan, July 5-9, 1985 // edited by S. Jackowski and K. Pawaowski
Pubbl/distr/stampa	Berlin : , : Springer-Verlag, , 1986
ISBN	3-540-47097-2
Edizione	[1st ed. 1986.]
Descrizione fisica	1 online resource (XVI, 400 p.)
Collana	Lecture notes in mathematics ; ; 1217
Classificazione	57S15 57S25 57R20 58G10
Disciplina	514
Soggetti	Topological transformation groups
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Bounds on the torus rank -- The equivariant wall finiteness obstruction and Whitehead torsion -- Homotopy actions and cohomology of finite groups -- Normally linear Poincaré complexes and equivariant splittings -- Free $(\mathbb{Z}/2)\mathbb{Z}$ -actions and a problem in commutative algebra -- Verschlingungszahlen von Fixpunktmenegen in Darstellungsformen. II -- An algebraic approach to the generalized Whitehead group -- Almost complex S^1 -actions on cohomology complex projective spaces -- A product formula for equivariant Whitehead torsion and geometric applications -- Balanced orbits for fibre preserving maps of S^1 and S^3 actions -- Involutions on 2-handlebodies -- Normal combinatorics of G -actions on manifolds -- Topological invariance of equivariant rational Pontrjagin classes -- On the existence of acyclic $\mathbb{Z}$ -complexes of the lowest possible dimension -- Unstable homotopy theory of homotopy representations -- Duality in orbit spaces -- Cyclic homology and idempotents in group rings -- $\mathbb{Z}/2$ surgery theory and smooth involutions on homotopy complex projective spaces -- Proper subanalytic transformation groups and unique triangulation of the orbit spaces -- A remark on duality and the Segal conjecture -- On the bounded and thin h-cobordism theorem parameterized by $\mathbb{Z}/k$ -- Algebraic and geometric splittings of the K - and L -groups of

polynomial extensions -- Coherence in homotopy group actions --
Existence of compact flat Riemannian manifolds with the first Betti
number equal to zero -- Which groups have strange torsion?.
