

1. Record Nr.	UNISA996466394503316
Autore	Doria Celso Melchiades
Titolo	Differentiability in Banach spaces, differential forms and applications / / Celso Melchiades Doria
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-77834-7
Descrizione fisica	1 online resource (369 pages)
Disciplina	515.732
Soggetti	Banach spaces Espais de Banach Stokes' theorem Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	<p>Intro -- Preface -- Introduction -- Contents -- 1 Differentiation in <math>\mathbb{R}^n</math> -- 1 Differentiability of Functions f: <math>\mathbb{R}^n \rightarrow \mathbb{R}</math> -- 1.1 Directional Derivatives -- 1.2 Differentiable Functions -- 1.3 Differentials -- 1.4 Multiple Derivatives -- 1.5 Higher Order Differentials -- 2 Taylor's Formula -- 3 Critical Points and Local Extremes -- 3.1 Morse Functions -- 4 The Implicit Function Theorem and Applications -- 5 Lagrange Multipliers -- 5.1 The Ultraviolet Catastrophe: The Dawn of Quantum Mechanics -- 6 Differentiable Maps I -- 6.1 Basics Concepts -- 6.2 Coordinate Systems -- 6.3 The Local Form of an Immersion -- 6.4 The Local Form of Submersions -- 6.5 Generalization of the Implicit Function Theorem -- 7 Fundamental Theorem of Algebra -- 8 Jacobian Conjecture -- 8.1 Case n=1 -- 8.2 Case n&gt;2 -- 8.3 Covering Spaces -- 8.4 Degree Reduction -- 2 Linear Operators in Banach Spaces -- 1 Bounded Linear Operators on Normed Spaces -- 2 Closed Operators and Closed Range Operators -- 3 Dual Spaces -- 4 The Spectrum of a Bounded Linear Operator -- 5 Compact Linear Operators -- 6 Fredholm Operators -- 6.1 The Spectral Theory of Compact Operators -- 7 Linear Operators on Hilbert Spaces -- 7.1 Characterization of Compact Operators on</p>

Hilbert Spaces -- 7.2 Self-adjoint Compact Operators on Hilbert Spaces  
-- 7.3 Fredholm Alternative -- 7.4 Hilbert-Schmidt Integral Operators  
-- 8 Closed Unbounded Linear Operators on Hilbert Spaces -- 3

Differentiation in Banach Spaces -- 1 Maps on Banach Spaces -- 1.1  
Extension by Continuity -- 2 Derivation and Integration of Functions f:  
[a,b]rightarrowE -- 2.1 Derivation of a Single Variable Function -- 2.2  
Integration of a Single Variable Function -- 3 Differentiable Maps II --  
4 Inverse Function Theorem (InFT) -- 4.1 Prelude for the Inverse  
Function Theorem -- 4.2 InFT for Functions of a Single Real Variable.  
4.3 Proof of the Inverse Function Theorem (InFT) -- 4.4 Applications of  
InFT -- 5 Classical Examples in Variational Calculus -- 5.1 Euler-  
Lagrange Equations -- 5.2 Examples -- 6 Fredholm Maps -- 6.1 Final  
Comments and Examples -- 7 An Application of the Inverse Function  
Theorem to Geometry -- 4 Vector Fields -- 1 Vector Fields in  
 $\mathbb{R}^n$  -- 2 Conservative Vector Fields -- 3 Existence and  
Uniqueness Theorem for ODE -- 4 Flow of a Vector Field -- 5 Vector  
Fields as Differential Operators -- 6 Integrability, Frobenius Theorem  
-- 7 Lie Groups and Lie Algebras -- 8 Variations over a Flow, Lie  
Derivative -- 9 Gradient, Curl and Divergent Differential Operators -- 5  
Vector Integration, Potential Theory -- 1 Vector Calculus -- 1.1 Line  
Integral -- 1.2 Surface Integral -- 2 Classical Theorems of Integration  
-- 2.1 Interpretation of the Curl and Div Operators -- 3 Elementary  
Aspects of the Theory of Potential -- 6 Differential Forms, Stokes  
Theorem -- 1 Exterior Algebra -- 2 Orientation on V and on the Inner  
Product on (V) -- 2.1 Orientation -- 2.2 Inner Product in (V) -- 2.3  
Pseudo-Inner Product, the Lorentz Form -- 3 Differential Forms -- 3.1  
Exterior Derivative -- 4 De Rham Cohomology -- 4.1 Short Exact  
Sequence -- 5 De Rham Cohomology of Spheres and Surfaces -- 6  
Stokes Theorem -- 7 Orientation, Hodge Star-Operator and Exterior  
Co-derivative -- 8 Differential Forms on Manifolds, Stokes Theorem --  
8.1 Orientation -- 8.2 Integration on Manifolds -- 8.3 Exterior  
Derivative -- 8.4 Stokes Theorem on Manifolds -- 7 Applications to the  
Stokes Theorem -- 1 Volumes of the (n+1)-Disk and of the n-Sphere  
-- 2 Harmonic Functions -- 2.1 Laplacian Operator -- 2.2 Properties of  
Harmonic Functions -- 3 Poisson Kernel for the n-Disk  $D^n$  -- 4  
Harmonic Differential Forms -- 4.1 Hodge Theorem on Manifolds -- 5  
Geometric Formulation of the Electromagnetic Theory.  
5.1 Electromagnetic Potentials -- 5.2 Geometric Formulation -- 5.3  
Variational Formulation -- 6 Helmholtz's Decomposition Theorem --  
Appendix A Basics of Analysis -- 1 Sets -- 2 Finite-dimensional Linear  
Algebra:  $V = \mathbb{R}^n$  -- 2.1 Matrix Spaces -- 2.2 Linear  
Transformations -- 2.3 Primary Decomposition Theorem -- 2.4 Inner  
Product and Sesquilinear Forms -- 2.5 The Sylvester Theorem -- 2.6  
Dual Vector Spaces -- 3 Metric and Banach Spaces -- 4 Calculus  
Theorems -- 4.1 One Real Variable Functions -- 4.2 Functions of  
Several Real Variables -- 5 Proper Maps -- 6 Equicontinuity and the  
Ascoli-Arzela Theorem -- 7 Functional Analysis Theorems -- 7.1 Riesz  
and Hahn-Banach Theorems -- 7.2 Topological Complementary  
Subspace -- 8 The Contraction Lemma -- Appendix B Differentiable  
Manifolds, Lie Groups -- 1 Differentiable Manifolds -- 2 Bundles:  
Tangent and Cotangent -- 3 Lie Groups -- Appendix C Tensor Algebra  
-- 1 Tensor Product -- 2 Tensor Algebra -- Appendix References --  
-- Index.
