

1. Record Nr.	UNISA990003005610203316
Autore	HEINZE, Rüdiger
Titolo	Ethics of literary forms in contemporary American literature / Rüdiger Heinze
Pubbl/distr/stampa	Munster : LIT, c2005
ISBN	3-8258-8536-4
Descrizione fisica	189 p. ; 24 cm.
Collana	Villigst Perspektiven ; 6
Disciplina	810.90054
Soggetti	Letteratura americana - Sec. 20.-21. - Saggi
Collocazione	VII.4.B. 414
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNISA996466474703316
Autore	Livsic Moshe S
Titolo	Commuting Nonselfadjoint Operators in Hilbert Space [[electronic resource]] : Two Independent Studies / / by Moshe S. Livsic, Leonid L. Waksman
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 1987
ISBN	3-540-47877-9
Edizione	[1st ed. 1987.]
Descrizione fisica	1 online resource (VI, 118 p.)
Collana	Lecture Notes in Mathematics, , 0075-8434 ; ; 1272
Disciplina	515
Soggetti	Mathematical analysis Analysis (Mathematics) Analysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	Classification of commuting non-selfadjoint operators is one of the most challenging problems in operator theory even in the finite-dimensional case. The spectral analysis of dissipative operators has led to a series of deep results in the framework of unitary dilations and characteristic operator functions. It has turned out that the theory has to be based on analytic functions on algebraic manifolds and not on functions of several independent variables as was previously believed. This follows from the generalized Cayley-Hamilton Theorem, due to M. S.Livsic: "Two commuting operators with finite dimensional imaginary parts are connected in the generic case, by a certain algebraic equation whose degree does not exceed the dimension of the sum of the ranges of imaginary parts." Such investigations have been carried out in two directions. One of them, presented by L.L.Waksman, is related to semigroups of projections of multiplication operators on Riemann surfaces. Another direction, which is presented here by M.S.Livsic is based on operator colligations and collective motions of systems. Every given wave equation can be obtained as an external manifestation of collective motions. The algebraic equation mentioned above is the

corresponding dispersion law of the input-output waves.
