   Nota di contenuto   Three basic principles -- The large sieve -- Arithmetic formulations of
                       the large sieve -- A weighted sieve and its application -- A lower
                       bound of Roth -- Classical mean value theorems -- New mean value
                       theorems -- Large moduli theorems -- Further results and conjectures
                       concerning mean and large moduli -- Mean moduli of L-functions --
                       Zero-free regions and the proliferation of zeros -- Distribution of
                       zeros of L-functions -- Least character non-residues and arg L(12+it,
                       x) -- The prime number theorems of Hoheisel and Selberg -- The
                       bombieri — Vinogradov theorem -- A lemma in additive prime number
                       theory -- The mean value theorem of Barban.
