

1. Record Nr.	UNISA996466508703316
Titolo	Mathematical aspects of finite element methods : proceedings of the conference held in Rome, December 10-12 1975 // edited by I. Galligani, E. Magenes
Pubbl/distr/stampa	Berlin ; ; Heidelberg : , : Springer-Verlag, , [1977] ©1977
ISBN	3-540-37158-3
Edizione	[1st ed. 1977.]
Descrizione fisica	1 online resource (IV, 364 p.)
Collana	Lecture Notes in Mathematics ; ; Volume 606
Disciplina	620.001515353
Soggetti	Finite element method Numerical analysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Mathematical problems of computational decisions in the finite element method -- Estimations d'Erreur dans L? pour les Inequations a Obstacle -- Hybrid methods for fourth order elliptic equations -- Variational techniques for the analysis of a lubrication problem -- Interior L? estimates for finite element approximations of solutions of elliptic equations -- H1-galerkin methods for a nonlinear dirichlet problem -- Discretization of rotational equilibrium in the finite element method -- Integration techniques for solving algebraic systems -- On the application of the minimum degree algorithm to finite element systems -- Methodes d'Elements Finis en Viscoelasticite Periodique -- On solving a mixed finite element approximation of the dirichlet problem for the biharmonic operator by a "quasi-direct" method and various iterative methods -- Sur l'Approximation de Problems a Frontiere Libre dans les Materiaux Inhomogenes -- Sur les Problemes Variationnels Noncoercifs et l'Equation du Transport -- Application of a mixed finite element method to a nonlinear problem of elasticity -- Error estimates for some variational inequalities -- Certains Problemes non Lineaires de la Physique des Plasmas -- L?-convergence of finite element approximations -- Dual-Mixed Hybrid finite element method for second-order elliptic problems -- A mixed finite element method for 2-nd order elliptic problems -- The influence of the choice of

connectors in the finite element method -- Some error estimates in  
Galerkin methods for parabolic equations -- Some superconvergence  
results in the finite element method.
