

1. Record Nr.	UNISA996466511103316
Titolo	Representations of algebras : proceedings of the Third International Conference on Representations of Algebras, held in Puebla, Mexico, August 4-8, 1980 / / edited by M. Auslander, E. Lluís
Pubbl/distr/stampa	Berlin, Germany : , : Springer, , [1981] ©1981
ISBN	3-540-38963-6
Edizione	[1st ed. 1981.]
Descrizione fisica	1 online resource (XVIII, 374 p.)
Collana	Lecture Notes in Mathematics, , 0075-8434 ; ; 903
Disciplina	512.46
Soggetti	Representations of algebras
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	On the number of terms in the middle of an almost split sequence -- On adjoint functors in representation theory -- Tilted algebras -- Representation-finite tree algebras -- Auslander-Reiten quivers of exact one-parameter partially ordered sets -- Complexity and Krull Dimension -- The universal cover of a representation-finite algebra -- Group-graded algebras and the zero relation problem -- Relative invariants and subgeneric orbits of quivers of finite and tame type -- Construction of tilted algebras -- On representations of the symmetric groups, nilpotent matrices, systems, vectorbundles and Schubert cells -- Induced modules and comodules and representations of BOCS's and DGC's -- Some remarks on the modular group algebras -- Topological aspects of matrix problems -- Some remarks on reflection functors -- Algebras stably equivalent to factors of hereditary -- On blocks with multiplicity one -- The connected component group of an algebra -- Cotorsion modules over tame finite-dimensional hereditary algebras -- Inequalities for blocktheoretic invariants -- TrD-periodic modules over selfinjective algebras -- On the 2-modular representations of M12 -- Extensions of artinian rings by hereditary injective modules -- Universal coverings of selfinjective algebras -- Brauer-thrall I for orders and its application to orders with loops in their Auslander-Reiten graph -- What conditions do vertices of irreducible modules satisfy? -- On algebras whose trivial extensions are of finite representation type.
