1.	Record Nr.	UNISA996466512003316
	Titolo	Hodge theory : proceedings, U. S. -Spain workshop held in Sant Cugat (Barcelona), Spain, June 24-30 1985. / / edited by E. Cattani [and three others]
	Pubbl/distr/stampa	Berlin, Germany : , : Springer-Verlag, , [1987] ©1987
	ISBN	3-540-47794-2
	Edizione	[1st ed. 1987.]
	Descrizione fisica	1 online resource (VI, 175 p.)
	Collana	Lecture Notes in Mathematics ; ; 1246
	Disciplina	516.35
	Soggetti	Geometry, Algebraic Hodge theory Mathematics
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Bibliographic Level Mode of Issuance: Monograph
	Nota di contenuto	Shimura Varieties of Weight Two Hodge Structures -- Variations of polarized hodge structure: Asymptotics and monodromy -- Some remarks on L2 and intersection cohomologies -- The L-adic cohomology of links -- Hyperrésolutions cubiques et applications à la théorie de hodge-deligne -- Iterated integrals and mixed hodge structures on homotopy groups -- Higher albanese manifolds -- A guide to unipotent variations of mixed hodge structure -- Truncations of mixed hodge complexes -- Poincaré lemma for a variation of polarized hodge structure -- Evaluation d'integrales et theorie de hodge -- Sur les structures de hodge mixtes associées aux cycles evanescents -- L2-cohomology of algebraic varieties in the fubinu metric -- Some remarks about the hodge conjecture.
	Sommario/riassunto	Over the past 2O years classical Hodge theory has undergone several generalizations of great interest in algebraic geometry. The papers in this volume reflect the recent developments in the areas of: mixed Hodge theory on the cohomology of singular and open varieties, on the rational homotopy of algebraic varieties, on the cohomology of a link, and on the vanishing cycles; L -realization of the intersection cohomology for the cases of singular varieties and smooth varieties

with degenerating coefficients; applications of cubical hyperresolutions and of iterated integrals; asymptotic behavior of degenerating variations of Hodge structure; the geometric realization of maximal variations; and variations of mixed Hodge structure. N.
