

1. Record Nr.	UNISA996466520003316
Autore	Baricz Árpád
Titolo	Series of Bessel and Kummer-Type Functions [[electronic resource] /] / by Árpád Baricz, Dragana Jankov Maširevi, Tibor K. Pogány
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-74350-3
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (XIX, 201 p.)
Collana	Lecture Notes in Mathematics, , 0075-8434 ; ; 2207
Disciplina	515.53
Soggetti	Special functions Sequences (Mathematics) Functions of real variables Functions of complex variables Differential equations Astronomy Astrophysics Special Functions Sequences, Series, Summability Real Functions Functions of a Complex Variable Ordinary Differential Equations Astronomy, Astrophysics and Cosmology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Introduction and Preliminaries -- 2. Neumann Series -- 3. Kapteyn Series -- 4. Schlömilch Series -- 5. Miscellanea.
Sommario/riassunto	This book is devoted to the study of certain integral representations for Neumann, Kapteyn, Schlömilch, Dini and Fourier series of Bessel and other special functions, such as Struve and von Lommel functions. The aim is also to find the coefficients of the Neumann and Kapteyn series, as well as closed-form expressions and summation formulas for the series of Bessel functions considered. Some integral representations are deduced using techniques from the theory of differential equations.

The text is aimed at a mathematical audience, including graduate students and those in the scientific community who are interested in a new perspective on Fourier–Bessel series, and their manifold and polyvalent applications, mainly in general classical analysis, applied mathematics and mathematical physics.
