

1. Record Nr.	UNISA996466573403316
Autore	Bornemann Folkmar <1967->
Titolo	Homogenization in time of singularly perturbed mechanical system // Folkmar Bornemann
Pubbl/distr/stampa	Berlin : , : Springer-Verlag, , [1998] ©1998
ISBN	3-540-69784-5
Edizione	[1st ed. 1998.]
Descrizione fisica	1 online resource (XIV, 158 p.)
Collana	Lecture notes in mathematics ; ; 1687
Disciplina	515.352
Soggetti	Differentiable dynamical systems Homogenization (Differential equations)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Homogenization of natural mechanical systems with a strong constraining potential -- Applications -- Adiabatic results in quantum theory and quantum-classical coupling.
Sommario/riassunto	This book is about the explicit elimination of fast oscillatory scales in dynamical systems, which is important for efficient computer-simulations and our understanding of model hierarchies. The author presents his new direct method, homogenization in time, based on energy principles and weak convergence techniques. How to use this method is shown in several general cases taken from classical and quantum mechanics. The results are applied to special problems from plasma physics, molecular dynamics and quantum chemistry. Background material from functional analysis is provided and explained to make this book accessible for a general audience of graduate students and researchers.
