

1. Record Nr.	UNISA996466594403316
Autore	Grosshans Frank D. <1942->
Titolo	Algebraic homogeneous spaces and invariant theory // Frank D. Grosshans
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer-Verlag, , [1997] ©1997
ISBN	3-540-69617-2
Edizione	[1st ed. 1997.]
Descrizione fisica	1 online resource (VIII, 152 p.)
Collana	Lecture Notes in Mathematics ; ; Volume 1673
Classificazione	13A50
Disciplina	512.74
Soggetti	Algebraic number theory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Observable subgroups -- The transfer principle -- Invariants of maximal unipotent subgroups -- Complexity -- Errata.
Sommario/riassunto	The invariant theory of non-reductive groups has its roots in the 19th century but has seen some very interesting developments in the past twenty years. This book is an exposition of several related topics including observable subgroups, induced modules, maximal unipotent subgroups of reductive groups and the method of U-invariants, and the complexity of an action. Much of this material has not appeared previously in book form. The exposition assumes a basic knowledge of algebraic groups and then develops each topic systematically with applications to invariant theory. Exercises are included as well as many examples, some of which are related to geometry and physics.
