Titolo	Complex analysis, fifth Romanian-Finnish seminar . Part 1 : proceedings of the seminar held in Bucharest, June 28 - July 3, 1981 / / edited by C. Andreian Cazacu [and three others]
Pubbl/distr/stampa	Berlin : , : Springer-Verlag, , 1983
ISBN	3-540-38671-8
Edizione	[1st ed. 1983.]
Descrizione fisica	1 online resource (XXII, 394 p.)
Collana	Lecture notes in mathematics ; ; 1013
Disciplina	515.9
Soggetti	Functional analysis Mappings (Mathematics) Functions of several complex variables Potential theory (Mathematics) Functions of complex variables
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	On Rolf Nevanlinna's mathematical work and on his role, together with Simion Stoilow, as a promotor of Romanian-Finnish mathematical relations -- Sur l'oeuvre mathématique de Simion Stoilow -- Quasiconformal mappings in abstract wiener spaces -- Homeomorphismes quasi-conformes sur des espaces localement convexes -- On domains of bounded dilatation -- Un invariant conforme lie aux geodesiques conformes -- On the quasiconformality of some mappings in normed spaces -- Remarks on p-valent quasimeromorphic functions -- The exponent of convergence of a discontinuous Möbius group -- Über Extremalprobleme bei im Mittel quasikonformen Abbildungen -- Bemerkungen zu Extremalproblemen bei in einem speziellen Mittel quasikonformen Abbildungen -- On parameters of a canonical form of a curve of genus three -- Remarks on de Franchis' theorem -- Quasiconformal mappings and F-harmonic measure -- On quasiconformal deformations on manifolds -- Quasiconformal mappings of the punctured plane -- Stability theorem for spatial quasiconformal deformations -- Raumwinkelkonforme Abbildungen -- The Hardy class of certain functions with integral

representations -- Applications of continued fractions in function theory -- P-adic interpolation and continuation of p-adic functions -- On some new bases in spaces of holomorphic functions -- The weight-changing operator and the Mellin transform of modular integrals -- Univalent solutions of Briot-Bouquet differential equations -- Subordination preserving integral operators -- The order of starlikeness of certain integral operators -- On the radius of alpha-starlikeness for starlike functions of order beta -- Some sufficient conditions of univalency for complex functions of the class C1 -- On endomorphisms of riemann surfaces -- Subclasses of univalent functions -- On the spherical derivative of a meromorphic function with a deficient value.
