   Nota di contenuto   Implicit definability and compactness in infinitary languages -- Some
                         remarks on the model theory of infinitary languages -- Remarks on the
                         theory of geometrical constructions -- Note on admissible ordinals --
                         An algebraic proof of the barwise compactness theorem -- Formulas
                         with linearly ordered quantifiers -- Some problems in group theory --
                         Choice of infinitary languages by means of definability criteria;
                         Generalized recursion theory -- Definability, automorphisms, and
                         infinitary languages -- The hanf number for complete sentences --
                         Quantified algebras -- Normal derivability in classical logic -- A
                         determinate logic -- (?1, ?) properties of unions of models.
