1. Record Nr.   UNISA996466635603316

   Titolo   Algebraic Geometry [[electronic resource]] : Proceedings of the
                         International Conference, held in L'Aquila, Italy, May 30 - June 4, 1988
                         / / edited by Andrew J. Sommese, Aldo Biancofiore, Elvira L. Livorni

   Pubbl/distr/stampa   Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer,
                         , 1990

   ISBN   3-540-46934-6

   Edizione   [1st ed. 1990.]

   Descrizione fisica   1 online resource (V, 320 p.)

   Collana   Lecture Notes in Mathematics, , 0075-8434 ; ; 1417

   Disciplina   516.35

   Soggetti   Algebraic geometry
                         Algebraic Geometry

   Lingua di pubblicazione   Francese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Note generali   Bibliographic Level Mode of Issuance: Monograph

   Nota di contenuto   Infinitesimal deformations of negative weights and hyperplane sections
                         -- On k-spanned projective surfaces -- On K-spannedness for
                         projective surfaces -- On the hyperplane sections of ruled surfaces --
                         Footnotes to a theorem of I. Reider -- An obstruction to moving
                         multiples of subvarieties -- Half-canonical surfaces in IP4 -- Groupes
                         de points de P2: Caractere et position uniforme -- On singular Del
                         Pezzo varieties -- Abelian surfaces in products of projective spaces --
                         Embedded projective varieties of small invariants. III -- On the
                         existence of some surfaces -- On the pluriadjoint maps of polarized
                         normal gorenstein surfaces -- On the adjoint line bundle to an ample
                         and spanned one -- Quadrics through a canonical surface --
                         Infinitesimal view of extending a hyperplane section - deformation
                         theory and computer algebra -- Toward abel-jacobi theory for higher
                         dimensional varieties -- Reider-serrano's method on normal surfaces.
