| Nota di contenuto | Generic bifurcation of periodic points -- Singularity theory for equivariant gradient bifurcation problems -- Classification of Z_q -equivariant gradient bifurcation problems -- Period-3 points of the generalized standard map -- Classification of D_q -equivariant gradient bifurcation problems -- Reversibility and degenerate bifurcation of period- q points of multiparameter maps -- Periodic points of equivariant symplectic maps -- Collision of multipliers at rational points for symplectic maps -- Equivariant maps and the collision of multipliers. |
| Sommario/riassunto | The monograph is a study of the local bifurcations of multiparameter symplectic maps of arbitrary dimension in the neighborhood of a fixed point. The problem is reduced to a study of critical points of an equivariant gradient bifurcation problem, using the correspondence between orbits of a symplectic map and critical points of an action functional. New results on singularity theory for equivariant gradient bifurcation problems are obtained and then used to classify singularities of bifurcating period- q points. Of particular interest is that a general framework for analyzing group-theoretic aspects and singularities of symplectic maps (particularly period- q points) is presented. Topics include: bifurcations when the symplectic map has |

spatial symmetry and a theory for the collision of multipliers near rational points with and without spatial symmetry. The monograph also includes 11 self-contained appendices each with a basic result on symplectic maps. The monograph will appeal to researchers and graduate students in the areas of symplectic maps, Hamiltonian systems, singularity theory and equivariant bifurcation theory.

Sommario/riassunto

This book explores the relationship between plantation labour and gender in Africa. Such a study is the more opportune because most of the existing works on plantation labour in Africa seem to have either under-studied or even ignored the changing conceptions of gender on the continent in recent times. One of the book's major concerns is to demonstrate that the introduction of plantation labour during colonial rule in Africa has had significant consequences for gender roles and relations within and beyond the capitalist labour process. The book focuses on two tea estates in Anglophone Cameroon

Sommario/riassunto

From the cult of Saint Anne to the devotees of the Virgin of Guadalupe, from Saint Anthony who competed with Christ for popularity in Brazil, to Jesuits who mixed freely with shamans that talked with the gods, this exciting new anthology examines the conversion of the colonized. The essays examine how New World spirits transformed into Old World saints - for example, the spirit of love transfigured into the Virgin Mary - as well as the implications of the canonization of the first American saint. *Colonial Saints* illustrates the complex and intimate connections among confessional life writing, canonization, and the practices of the Inquisition. There was a dynamic exchange involving local agendas, the courts in Spain and France, and, of course, Rome. This bold collection clearly shows the interplay between slavery and spirituality, conversion and control, and the links between the sacred and the political.
