| Nota di contenuto | Some remarks about the problem of graph identification -- Motivation
-- A construction of a stationary graph -- Properties of cells --
Properties of cellular algebras of rank greater than one -- Cellular
algebras arising in the theory of permutation groups -- Some classes
of cellular algebras -- Imprimitve cells and construction of factor-cells
-- Construction of the quotient in the case of cellular algebras of rank |

greater than one -- On the structure of correct stationary graphs and cells having more than one normal subcell -- Properties of primitive cells -- Algebraic properties of cellular algebras -- Some modifications of stabilization -- Kernels and stability with respect to kernels -- Deep stabilization -- Examples of results using the stability of depth 1 -- Some definitions and explanations about exhaustive search -- An algorithm of graph canonization -- A practical algorithm of graph canonization -- An algorithm of construction of strongly regular graphs -- Tables of strongly regular graphs with n vertices, $10 \leq n \leq 28$ -- Some properties of 25- and 26- families.
