

1. Record Nr.	UNISA996466701903316
Titolo	Recent Developments in Nonequilibrium Thermodynamics [[electronic resource] ] : Proceedings of the Meeting Held at Bellaterra School of Thermodynamics, Autonomous University of Barcelona, Bellaterra (Barcelona) Spain, September 26–30, 1983 // edited by J. Casas-Vazquez, D. Jou, G. Lebon
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 1984
ISBN	3-540-38810-9
Edizione	[1st ed. 1984.]
Descrizione fisica	1 online resource (XIII, 489 p.)
Collana	Lecture Notes in Physics, , 0075-8450 ; ; 199
Disciplina	536.7
Soggetti	Thermodynamics Statistical physics Dynamical systems Condensed matter Complex Systems Condensed Matter Physics Statistical Physics and Dynamical Systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Early applications of extended irreversible thermodynamics -- Extended thermodynamics — past, present, future -- An approach to extended irreversible thermodynamics I : Macroscopic aspects -- An approach to extended irreversible thermodynamics II. Fluctuation theory -- An approach to extended irreversible thermodynamics III. Nonequilibrium equations of state and comparison with generalized hydrodynamics -- Extended irreversible thermodynamics and chemical kinetics -- Non-stationary relativistic thermodynamics and some cosmological problems -- Generalized Gibbs equations in irreversible thermodynamics -- Nonequilibrium thermodynamics: A hidden variable approach -- Fluctuations around equilibrium -- Theories of fluctuations in nonequilibrium systems -- Microscopic approaches to nonlinear hydrodynamics -- Unified theory of internal and external

fluctuations -- Dynamics of nonequilibrium transitions -- Noise in electrical systems -- Fundamental remarks on evaluating dissipation inequalities -- On classical nonequilibrium thermodynamics and its extensions -- On extended Onsagerian thermodynamics -- Relativistic generalized hydrodynamics -- Variational principles in extended irreversible thermodynamics. Application to heat and mass transfer -- Extended thermodynamics of dense gases -- Steady states resulting from coupled chemical oscillators -- Fluctuations in non-linear viscoelastic systems -- Viscoelastic models for brownian motion in fluids with spin -- Correlation functions of processes driven by external colored noise -- A non-renormalized and a renormalized description of the Fokker-Planck dynamics -- The equation which governs irreversibility in continuum mechanics -- Nonequilibrium statistical mechanics of dilute relativistic plasmas.
