

1. Record Nr.	UNISA996466704003316
Titolo	Impacts on Earth [[electronic resource] /] / edited by Daniel Benest, Claude Froeschle
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 1998
ISBN	3-540-69703-9
Edizione	[1st ed. 1998.]
Descrizione fisica	1 online resource (XVII, 248 p.)
Collana	Lecture Notes in Physics, , 0075-8450 ; ; 505
Disciplina	523.01
Soggetti	Astrophysics Planetology Space sciences Geophysics Observations, Astronomical Astronomy—Observations Astrobiology Astrophysics and Astroparticles Space Sciences (including Extraterrestrial Physics, Space Exploration and Astronautics) Geophysics/Geodesy Astronomy, Observations and Techniques
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	I: Origin and Dynamics of Projectiles -- II. Physics of Shocks -- III. Terrestrial Impacts.
Sommario/riassunto	Impact phenomena play an essential role in the formation of planets and great influence during their evolution. The first part of this book describes the dynamics that propels asteroids in our solar system; the second part is devoted to impact phenomena; the third inspects terrestrial impacts of asteroids and the hazards due to space debris orbiting our planet. The book addresses scientists working in astronomy, extraterrestrial physics and geophysics. But it should also be of great interest to a learned public that wants to know about the most recent developments in this fast-moving field of theoretical and

observational research.
