1. Record Nr. UNISA996466749703316

Titolo	Chirality, magnetism and magnetoelectricity : separate phenomena and joint effects in metamaterial structures / / Eugene Kamenetskii, editor
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-62844-2
Descrizione fisica	1 online resource (587 pages)
Collana	Topics in Applied Physics ; ; Volume 138
Disciplina	620.11
Soggetti	Metamaterials Electronics - Materials Magnetic materials
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Contents -- Contributors -- 1 Chiral Coupling to Magnetodipolar Radiation -- 1.1 Introduction -- 1.2 Chiral Excitation of Spin Waves by Metallic Stripline -- 1.2.1 Oersted Magnetic Fields -- 1.2.2 Chiral Excitation of Spin Waves -- 1.3 Chiral Spin Wave Excitation and Absorption by a Magnetic Transducer -- 1.3.1 Chiral Magnetodipolar Field -- 1.3.2 Non-local Detection -- 1.3.3 Coherent Chiral Spin Wave Transmission -- 1.3.4 Incoherent Chiral Pumping -- 1.4 Conclusion and Outlook -- References -- 2 Surface Plasmons for Chiral Sensing -- 2.1 Introduction -- 2.1.1 Chirality and Optical Activity -- 2.1.2 Chiral Sensing Techniques -- 2.2 Surface Plasmon Resonance (SPR) -- 2.2.1 SPPs at a Metal-Dielectric Interface -- 2.2.2 SPPs at a Metal-Chiral Interface -- 2.3 CHISPR -- 2.3.1 Mechanism of Chiral-Dependent SPR-Reflectance Angular Split -- 2.3.2 Sensitivity of Chiral-Dependent SPR-reflectance Angular Split -- 2.3.3 Differential Measurements -- 2.4 Complete Measurement of Chirality -- 2.5 Optical Chirality Conservation -- 2.6 Discussion and Conclusions -- References -- 3 Spin-Polarized Plasmonics: Fresh View on Magnetic Nanoparticles -- 3.1 Introduction -- 3.2 Spin Polarization in Co Nanoparticles -- 3.3 Methods -- 3.4 Structural Properties -- 3.5 Magnetic Response -- 3.6 Optical Resonance in Spin-Polarized Co Nanoparticles -- 3.7 Effect of Dimers -- 3.8 Conclusions -- References

-- 4 Chirality and Antiferromagnetism in Optical Metasurfaces -- 4.1 Introduction -- 4.1.1 Optical Elements -- 4.1.2 History of Optical Metasurfaces -- 4.2 Chirality of Light -- 4.2.1 Spin of a Photon and Spin Angular Momentum -- 4.2.2 Optical Vortices and Orbital Angular Momentum -- 4.3 Optical Chiral Metasurfaces -- 4.3.1 Plasmonic Chiral Metasurfaces -- 4.3.2 Chiral Nanosieves -- 4.3.3 Dielectric Chiral Metasurfaces and Anti-ferromagnetic Resonances. 4.4 Applications of Chiral Light and Metasurfaces -- 4.4.1 Circular Dichroism and Helical Dichroism -- 4.4.2 Chiral Meta-Optics -- 4.5 Conclusions -- References -- 5 Light-Nanomatter Chiral Interaction in Optical-Force Effects -- 5.1 Introduction -- 5.2 3D Near-Field CD by Optical-Force Measurement -- 5.2.1 Model and Method -- 5.2.2 CD Spectra and NF-CD Maps -- 5.2.3 CD of Optical Force -- 5.3 Optical Force to Rotate Nano-Particles in Nanoscale Area -- 5.3.1 Model and Method -- 5.3.2 Optical Force to Rotate the NP -- 5.3.3 Optical Current -- 5.4 Summary -- References -- 6 Magnetoelectricity of Chiral Micromagnetic Structures -- 6.1 Introduction. Chiral Structures of an Order Parameter -- 6.2 Microscopic Mechanisms of Spin Flexoelectricity -- 6.3 Chirality Dependent Domain Wall Motion -- 6.4 Chirality Dependent Bubble Domain Generation -- 6.5 Spin Flexoelectricity of Bloch Lines, Vortexes and Skyrmions -- 6.6 Conclusion -- Appendix: Experimental and Calculation Details -- References -- 7 Current-Induced Dynamics of Chiral Magnetic Structures: Creation, Motion, and Applications -- 7.1 Introduction -- 7.2 Continuum Model for the Magnetization -- 7.2.1 Magnetization Statics -- 7.2.2 Magnetization Dynamics in the Presence of Spin-Torques -- 7.3 Magnetic Solitons -- 7.4 Creation of Magnetic Solitons -- 7.4.1 Creation of One-Dimensional Solitons -- 7.4.2 Creation of Two-Dimensional Solitons -- 7.5 Motion of Magnetic Solitons -- 7.5.1 A Collective Coordinate Approximation: Thiele Equations of Motion -- 7.5.2 Magnetization Dynamics of Domain Walls in Nanowires -- 7.5.3 Magnetization Dynamics of Two-Dimensional Solitons -- 7.5.4 Magnetization Dynamics of Three-Dimensional Hopfions -- 7.6 Potential Applications -- 7.6.1 Storage and Logic Technologies -- 7.6.2 Unconventional Spintronics-Based Computing Schemes -- 7.7 Conclusion -- References.
8 Microwave-Driven Dynamics of Magnetic Skyrmions Under a Tilted Magnetic Field: Magnetic Resonances, Translational Motions, and Spin-Motive Forces -- 8.1 Introduction -- 8.2 Spin Model of the Skyrmion-Hosting Magnets -- 8.3 Microwave-Active Spin-Wave Modes -- 8.4 Microwave-Magnetic-Field-Driven Translational Motion of Skyrmion Crystal -- 8.5 Microwave-Electric-Field-Driven Translational Motion of Isolated Skyrmions -- 8.6 Electrically Driven Spin Torque and Dynamical Dzyaloshinskii-Moriya Interaction -- 8.7 Microwave-Induced DC Spin-Motive Force -- 8.8 Concluding Remarks -- References -- 9 Symmetry Approach to Chiral Optomagnonics in Antiferromagnetic Insulators -- 9.1 Introduction -- 9.2 Optical Chirality and Nongeometric Symmetries of the Maxwell's Equations -- 9.2.1 Symmetry Analysis of the Maxwell's Equations -- 9.2.2 Optical Chirality in Gyrotropic Media -- 9.3 Spin-Wave Chirality in Antiferromagnetic Insulators -- 9.3.1 Equations of Motion for Antiferromagnetic Spin Waves -- 9.3.2 Nongeometric Symmetries for Spin-Wave Dynamics -- 9.3.3 Conserving Chirality of Spin Waves -- 9.3.4 Spin-Wave Chirality in Dissipative Media -- 9.4 Excitation of Magnon Spin Photocurrents with Polarized Fields -- 9.4.1 Magnon Spin Currents in Antiferromagnets -- 9.4.2 Photo-Excitation of Magnon Spin Currents -- 9.4.3 Microscopic Theory of Magnon Spin Photocurrents -- 9.4.4 Magnon Spin Photocurrents in Antiferromagnetic Insulators and Low

Dimensional Materials -- 9.5 Conclusions -- References -- 10 Realization of Artificial Chirality in Micro-/Nano-Scale Three-Dimensional Plasmonic Structures -- 10.1 Introduction -- 10.2 Chirality at the Micrometer-Scale or Higher: Top-Down Approach -- 10.2.1 Direct Laser Writing -- 10.2.2 Buckling Process Using Focused Ion Beam -- 10.3 Chirality at the Nanometer to Micrometer Scale -- 10.3.1 Electron Beam Lithography Overlay.
10.3.2 Glancing Angle Deposition -- 10.3.3 Unconventional Approaches -- 10.4 Chirality at a Nanometer Scale: Bottom-Up Approach -- 10.4.1 Molecular Self-assembly -- 10.4.2 DNA Self-assembly -- 10.4.3 Block Copolymer Self-assembly -- 10.5 Conclusion -- References -- 11 Floquet Theory and Ultrafast Control of Magnetism -- 11.1 Introduction -- 11.2 Floquet Engineering -- 11.2.1 Floquet Theorem -- 11.2.2 Discretized Fourier Transformation and Matrix Form of Schrødinger Equation -- 11.2.3 Floquet-Magnus Expansion and Floquet Hamiltonian -- 11.2.4 Physical Meaning of Floquet Hamiltonian -- 11.3 Laser and Typical Excitations in Solids -- 11.4 Floquet Engineering in Magnets -- 11.4.1 Inverse Faraday Effect by THz Laser -- 11.4.2 Ultrafast Control of Spin Chirality and Spin Current in Multiferroic Magnets -- 11.5 Summary and Outlook -- References -- 12 Magnetoelastic Waves in Thin Films -- 12.1 Introduction -- 12.2 Spin Waves -- 12.2.1 Magnetic Interactions and Magnetization Dynamics -- 12.2.2 Spin Waves in the Bulk Ferromagnets -- 12.2.3 Spin Waves in Ferromagnetic Thin Films -- 12.3 Elastic Waves -- 12.3.1 Elastodynamic Equations of Motion -- 12.3.2 Elastic Waves in Thin Films -- 12.4 Magnetoelastic Waves -- 12.4.1 Magnetoelastic Interactions -- 12.4.2 Magnetoelastic Waves in Thin Films -- 12.4.3 Damping of Magnetoelastic Waves -- 12.5 Conclusion -- References -- 13 Theoretical Generalization of the Optical Chirality to Arbitrary Optical Media -- 13.1 Introduction -- 13.2 Electromagnetic Energy Density in Dispersive and Lossy Media: A General Approach from the Continuity Equation -- 13.2.1 Poynting's Theorem and Energy Density in Non-Dispersive Media -- 13.2.2 Electromagnetic Energy Density in Dispersive Media: Lossless (Brillouin's Approach) and Lossy (Loudon's Approach) Cases -- 13.3 Generalizing the Conservation Law for the Optical Chirality.
13.4 Optical Chirality Density in Linear Dispersive Media -- 13.4.1 Optical Chirality Density in Dispersive and Lossless Media: Brillouin's Approach -- 13.4.2 Optical Chirality Density in Dispersive and Lossy Media: Loudon's Approach -- 13.4.3 Brillouin's Approach Vs Loudon's Approach -- 13.5 Conclusions and Outlook -- References -- 14 Topology in Magnetism -- 14.1 Introduction -- 14.2 Topological Spin Textures -- 14.2.1 Domain Walls -- 14.2.2 Vortices and Skyrmions -- 14.2.3 Hopfions -- 14.3 Topological Spin Waves -- 14.3.1 Topologically Protected Edge Spin Waves -- 14.3.2 3D Topological Spin Waves -- 14.4 Conclusion -- References -- 15 Topological Dynamics of Spin Texture Based Metamaterials -- 15.1 Introduction -- 15.2 Topological Structures, Properties, and Applications of Magnetic Solitons -- 15.3 The Topological Properties of Skyrmion Lattice -- 15.3.1 Large-Scale Micromagnetic Simulations -- 15.3.2 Theoretical Model -- 15.4 Corner States in a Breathing Kagome Lattice of Vortices -- 15.4.1 The Theoretical Results and Discussions -- 15.4.2 Micromagnetic Simulations -- 15.5 Corner States in a Breathing Honeycomb Lattice of Vortices -- 15.5.1 Theoretical Model -- 15.5.2 Corner States and Phase Diagram -- 15.5.3 Micromagnetic Simulations -- 15.6 Conclusion and Outlook -- References -- 16 Antiferromagnetic Skyrmions and Bimerons -- 16.1 Introduction -- 16.2 Current-Driven Creation, Motion, and Chaos of Antiferromagnetic Skyrmions

		and Bimerons -- 16.3 Spin Torque Nano-oscillators Based on Antiferromagnetic Skyrmions -- 16.4 Synthetic Antiferromagnetic Skyrmions Driven by the Spin Current -- 16.5 Antiferromagnetic Skyrmions Driven by the Magnetic Anisotropy Gradient -- 16.6 Pinning and Depinning of Antiferromagnetic Skyrmions -- 16.7 Summary -- References -- 17 Axion Electrodynamics in Magnetoelectric Media -- 17.1 Introduction. 17.2 Nondynamical Axion Electrodynamics.
2.	Record Nr.	UNINA9910133540103321
	Autore	Friedmann Georges <1902-1977.>
	Titolo	Georges Friedmann : un sociologue dans le siècle, 1902-1977 / / sous la direction de Pierre Grémion et Françoise Piotet
	Pubbl/distr/stampa	Paris, : CNRS éditions, c2004
	ISBN	9782271078001 2271078008
	Descrizione fisica	1 online resource (184 p.)
	Collana	CNRS sociologie
	Altri autori (Persone)	FriedmannGeorges <1902-1977.> GrémionPierre PiotetF (Françoise)
	Disciplina	301/.092
	Soggetti	Sociologists - France Sociology - France - History - 20th century
	Lingua di pubblicazione	Francese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	"Le présent ouvrage est issu d'un colloque qui s'est tenu à l'Ecole normale supérieure le 7 juin 2002 à l'occasion du centenaire de la naissance de Georges Friedmann"--P. [7].
	Nota di bibliografia	Includes bibliographical references (p. [181]-184).
	Sommario/riassunto	Georges Friedmann est une figure à redécouvrir. À l’occasion du centenaire de sa naissance, le présent ouvrage retrace la trajectoire de l’homme avant, pendant et après la Seconde Guerre mondiale. Écrivain, voyageur, résistant, étranger à la tradition durkheimienne, marxiste plus spinoziste qu’hégélien, Friedmann a su faire partager ses curiosités et ses inquiétudes pour relancer la sociologie après la guerre. Dès la fin des années 40, tournant le dos à la Sorbonne, s’appuyant sur

des institutions comme le CNRS et le Conservatoire National des Arts et Métiers, il met le pied à l'étrier à une nouvelle génération qui s'emploie à développer la sociologie hors de la clôture académique. À l' articulation de l'histoire intellectuelle et de l'histoire de la sociologie, ce livre est bâti en trois parties : histoire, œoeuvres, témoignages. Il fait dialoguer ceux qui furent ses proches dans la refondation de la sociologie et les membres d'une nouvelle génération qui, n'ayant pas connu directement Georges Friedmann, se sentent plus libres pour réinterroger l'œoeuvre.
