

1. Record Nr.	UNISA996466828503316
Autore	Gruber C
Titolo	Group Analysis of Classical Lattice Systems [[electronic resource] /] / by C. Gruber, A. Hintermann, D. Merlini
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 1977
ISBN	3-540-37407-8
Edizione	[1st ed. 1977.]
Descrizione fisica	1 online resource (XIV, 331 p.)
Collana	Lecture Notes in Physics, , 0075-8450 ; ; 60
Disciplina	530.1
Soggetti	Mathematical physics Group theory Theoretical, Mathematical and Computational Physics Group Theory and Generalizations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Definitions and group structure -- The duality transformation -- Duality relation for the correlation functions -- Phase transitions with spontaneous symmetry breakdown. Ergodic decomposition -- Series and cluster expansion an application of universality hypothesis a "generalized" droplet-model -- The partial trace transformation. Equation for the correlation functions and representation of the symmetry group -- Invariant equilibrium states and duality transformation for infinite systems -- Asano contraction and group structure. Analyticity properties of the free energy -- Analyticity and uniqueness of the invariant equilibrium state -- Definitions and group structure for systems with constraints -- Expansions for the partition function -- Partial trace method and equilibrium equations -- Duality transformation restricted to finite bonds -- Asano contractions and unicity of state -- General framework of higher spin systems -- Physical implications of the group structure -- Spin 1 lattice systems -- The duality transformation -- Zeroes of the partition function.
