

1. Record Nr.	UNISA996466833003316
Titolo	Matter Under Extreme Conditions [[electronic resource]] : Proceedings of the 33. Internationale Universitätswochen für Kern- und Teilchenphysik Schladming, Austria, 27 February – 5 March 1994 // edited by Heimo Latal, Wolfgang Schweiger
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 1994
ISBN	3-540-49042-6
Edizione	[1st ed. 1994.]
Descrizione fisica	1 online resource (IX, 246 p.)
Collana	Lecture Notes in Physics, , 0075-8450 ; ; 440
Disciplina	539.7
Soggetti	Nuclear physics Heavy ions Nuclear fusion Elementary particles (Physics) Quantum field theory Observations, Astronomical Astronomy—Observations Astrophysics Geophysics Nuclear Physics, Heavy Ions, Hadrons Nuclear Fusion Elementary Particles, Quantum Field Theory Astronomy, Observations and Techniques Astrophysics and Astroparticles Geophysics/Geodesy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Big bang baryogenesis -- Solar neutrinos -- An introduction to the physics of type II supernova explosions -- Exotic QED processes and atoms in strong external fields -- Theoretical aspects of quantum electrodynamics in strong fields -- The search for the quark-gluon plasma -- Physics at LHC -- Seminars.

## Sommario/riassunto

In this volume seven leading theoreticians and experimenters review the origin of the asymmetry of matter and antimatter in the Big Bang, solar neutrinos, the physics of enormous densities and temperatures in stars and of immense magnetic fields around collapsed stars, strong electric fields in heavy ion collisions, and the extreme conditions in quark-gluon plasmas. The articles address nuclear and particle physicists, especially graduate students, but also astrophysicists and cosmologists, since they have to deal with events under the extreme physical conditions discussed here.
