

1. Record Nr.	UNISA996466835003316
Titolo	Mathematical Problems in Theoretical Physics [[electronic resource]] : Proceedings of the International Conference on Mathematical Physics Held in Lausanne, Switzerland August 20–25, 1979 // edited by K. Osterwalder
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 1980
ISBN	3-540-39174-6
Edizione	[1st ed. 1980.]
Descrizione fisica	1 online resource (VIII, 417 p. 4 illus.)
Collana	Lecture Notes in Physics, , 0075-8450 ; ; 116
Disciplina	530.1
Soggetti	Mathematical physics Theoretical, Mathematical and Computational Physics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Recent developments in quantum scattering theory -- Schrödinger operators with electric or magnetic fields -- A new method for asymptotic completeness -- Pathological spectral properties -- Proff that the H- ion has only one bound state: A review, a new result, and some related unsolved problems -- Number of eigenvalues of many-body Hamiltonians and Efimov's effect -- On the exponential fall off of wavefunctions and electron densities -- Exact results for confining potentials -- The quasi-classical limit of quantum scattering theory -- Semiclassical quantum mechanics for coherent states -- Random schrödinger operators some rigorous results -- On the scattering problem with indefinite metric -- Some open problems about Coulomb systems -- Time dependent phenomena in statistical mechanics -- Holonomic Quantum Fields — The unanticipated link between deformation theory of differential equations and quantum fields — -- Instability of phase coexistence and translation invariance in two dimensions -- Topology and defects in ordered media -- Debye screening in classical statistical mechanics -- Equilibrium properties of classical systems with long-range forces -- On the lack of Fréchet differentiability in more phase regions -- Long time tail for spacially inhomogeneous random walks -- Why is there a solid state? -- Some

remarks on the surface tension -- Analytic structure of Green's functions in quantum field theory -- Constructive field theory -- $1/N$ expansion-some rigorous results -- The renormalization group in the euclidean scalar superrenormalizable field theories -- Expansion and summability methods in constructive field theory -- The physical-region multiparticle S matrix -- Quantized gauge fields: Results and problems -- Clustering, charge-screening and the mass-spectrum in local quantum field theory -- The ultraviolet stability bounds for some lattice ? - models and lattice Higgs-Kibble models -- Mathematical aspects of quantum field theory in curved space-time -- Classical and quantum aspects of the inverse scattering method -- Magnetic monopoles and non-abelian gauge theories -- to papers presented at the gauge theory session -- The unification of physics -- Gauge theories of gravitation -- Supergravity as a gauge theory derived from matter coupling -- Gravitational instantons: A survey -- Instantons and line geometry -- Geometric aspects of symmetry breaking in gauge theories -- Invariance conditions for gauge fields -- Nonlinear group representations and the linearizability of nonlinear equations -- Determinants, Green Functions and induced action -- Spin gauge theory of electric and magnetic spinors -- Spin structures and gauge theory -- Recent results on differentiable dynamical systems -- On some systems motivated by the Lorenz equations: Numerical results -- Properties of continuous maps of the interval to itself -- Remarks on the accumulation of period-doubling bifurcations -- An overview of supersymmetry and supergravity -- Superspace aspects of supersymmetry and supergravity -- Symmetries of supergravity models -- A review of derivations -- Thermal equilibrium and correlation inequalities -- On the possible temperatures of a C^* -dynamical system -- A review on semigroups of completely positive maps -- Pseudospaces, pseudogroups and pontriagin duality.
