1.	Record Nr. Autore	UNISA996466843503316 Orchiston Wayne
	Titolo Pubbl/distr/stampa	Golden Years of Australian Radio Astronomy : An Illustrated History Cham, : Springer Nature, 2021 Cham : , : Springer International Publishing AG, , 2022 ©2021
	ISBN	3-319-91843-5
	Descrizione fisica	1 online resource (281 pages)
	Collana	Historical and Cultural Astronomy
	Altri autori (Persone)	RobertsonPeter Sullivan IIIWoodruff T
	Soggetti	History of science Astronomy, space & time
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Sommario/riassunto	The evolution of Australian radio astronomy from 1945 to 1960 has been studied in detail by numerous historians of science in recent years. This Open Access book is the first to present an overview of this remarkable chapter in Australian science. The book begins in the post- war period, as the Radiophysics Laboratory in Sydney switched from secret wartime research on radar to peacetime applications of this new technology. Next follows the detection of radio waves from space and the ensuing transformation of this fledgling science into the dominant research program at the Radiophysics Lab. Drawing from this history, the book shows how by 1960 the Radiophysics Lab had become the largest and most successful radio astronomy group in the world. The final chapter presents an overview of Australian radio astronomy from 1960 to the present day, as Australia prepares to co-host the multi- national, multi-billion-dollar Square Kilometre Array. Nearly 300 high- quality images complement the text, drawn from a wide range of sources including the extensive collection held by the CSIRO Radio Astronomy Image Archive. The book will be an essential reference for readers interested in the scientific and cultural development of radio astronomy. This book is published open access under a CC BY 4.0
