

1. Record Nr.	UNISA996466857203316
Titolo	Harmonic analysis : proceedings of a conference held in Cortona, Italy, July 1-9, 1982 // edited by Giancarlo Mauceri, Fulvio Ricci and Guido Weiss
Pubbl/distr/stampa	Berlin : , : Springer-Verlag, , [1983] ©1983
ISBN	3-540-39885-6
Edizione	[1st ed. 1983.]
Descrizione fisica	1 online resource (XII, 452 p.)
Collana	Lecture notes in mathematics ; ; 992
Disciplina	515.2433
Soggetti	Harmonic analysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Un nouveal espace fonctionnel adapte a l'etude des operateurs definis par des integrales singulieres -- Application of Carleson measures to partial differential equations and Fourier multiplier problems -- On the maximal function for the Mehler kernel -- Pointwise behavpour of solutions to Schrödinger equations -- An application of Lp estimates to scattering theory -- Elementary characterizations of the Morrey-Campanato spaces -- On nonisotropic Lipschitz spaces -- Lipschitz spaces on compact rank one symmetric spaces -- On the Sobolev spaces $W_{k,1}(\mathbb{R}^n)$ -- Interval averages of H1-functions and BMO norm of inner functions -- An H1 function with non-summable Fourier expansion -- Integral characterization of a space generated by blocks -- Another characterization of H_p , $0 < p < \infty$, with an application to interpolation -- The maximal function on weighted BMO -- Weighted Hardy spaces and the Laplace transform -- Vector valued inequalities of Marcinkiewicz-Zygmund and Grothendieck type for Toeplitz forms -- Functions of bounded variation and fractional dimension -- Pathological properties and S.I.P. measures on metrizable groups -- Uniformly bounded representations and LP- convolution operators on a free group -- Spherical functions on symmetric graphs -- A remark on mappings of bounded symmetric domains into balls -- The Cauchy-Ahlfors operator, an invariant differential operator for vector fields -- A kernel for generalized Cauchy-Riemann systems -- Harmonic analysis

on groups of Heisenberg type -- Surjectivity of the conditionals
expectations on the L^1 spaces -- Generalisations of Heisenberg's
inequality.
