

1. Record Nr.	UNISA996466871703316
Autore	Diller Justus
Titolo	ISILC - Proof Theory Symposion [[electronic resource] ] : Dedicated to Kurt Schütte on the Occasion of His 65th Birthday. Proceedings of the International Summer Institute and Logic Colloquium, Kiel 1974 // herausgegeben von J. Diller, G.H. Müller
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 1975
ISBN	3-540-38020-5
Edizione	[1st ed. 1975.]
Descrizione fisica	1 online resource (CD, 390 p.)
Collana	Lecture Notes in Mathematics, , 1617-9692 ; ; 500
Disciplina	511.36
Soggetti	Mathematical logic Mathematical Logic and Foundations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Verzeichnis der Publikationen von Kurt Schütte -- Normalfunktionen und Konstruktive Systeme von Ordinalzahlen -- Sound functors -- A study of generalized standardization in combinatory logic -- Intensionale Funktionalinterpretation der Analysis -- Non-extensional type-free theories of partial operations and classifications, I -- Kombinatorische Konstruktionen mit Beweisen und Schnittelimination -- Calculability of the primitive recursive functionals of finite type over the natural numbers -- Observations on a recent generalization of completeness theorems due to Schütte -- Strong normalization for arithmetic -- Intuitionistic completeness of a restricted second-order logic -- The real elements in a consistency proof for simple type theory I -- Church Rosser Theorem für $\lambda$ -Kalküle mit Unendlich Langen Termen -- Über Skolemerweiterungen in der Intuitionistischen Logik mit Gleichheit -- Eine Variante des Bezeichnungssystems $W(X)$ für Ordinalzahlen -- An upper bound for the provability of transfinite induction in systems with N-times iterated inductive definitions -- Comments on Gentzen-type procedures and the classical notion of truth -- Bemerkungen zu Regel und Schema -- Infinite terms and recursion in higher types -- Consistency proofs and ordinals -- Markov's principle and Markov's rule for theorems of choice sequences.
