

1. Record Nr.	UNISA996466872403316
Autore	Fulton William <1939->
Titolo	Schubert varieties and degeneracy loci // William Fulton, Piotr Pragacz
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer-Verlag, , [1998] ©1998
ISBN	3-540-69804-3
Edizione	[1st ed. 1998.]
Descrizione fisica	1 online resource (X, 150 p.)
Collana	Lecture Notes in Mathematics ; ; 1689
Disciplina	516.35
Soggetti	Schubert varieties Intersection theory (Mathematics) Vector bundles
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	to degeneracy loci and schubert polynomials -- Modern formulation; Grassmannians, flag varieties, schubert varieties -- Symmetric polynomials useful in geometry -- Polynomials supported on degeneracy loci -- The Euler characteristic of degeneracy loci -- Flag bundles and determinantal formulas for the other classical groups -- and polynomial formulas for other classical groups -- The classes of Brill-Noether loci in Prym varieties -- Applications and open problems.
Sommario/riassunto	Schubert varieties and degeneracy loci have a long history in mathematics, starting from questions about loci of matrices with given ranks. These notes, from a summer school in Thurnau, aim to give an introduction to these topics, and to describe recent progress on these problems. There are interesting interactions with the algebra of symmetric functions and combinatorics, as well as the geometry of flag manifolds and intersection theory and algebraic geometry.
