Nota di contenuto	Frontmatter -- Acknowledgements -- Table of Contents -- Figures -- Introduction -- 1 Responding to the Transport Mismatch, 1920-1940 -- 2 Protesting Bus Regulations during the Depression, 1926-1938 -- 3 Mobility Austerity during War and Scarcity, 1940-1947 -- 4 Mobility Barriers during Postwar Industrialization, 1947-1970 -- 5 Postwar Mobility Practices, 1947-1970 -- 6 Disciplining Cyclists and Moped Riders -- 7 Mobilizing Rural and Migrant Workers by Company Bus -- 8 Leaving Workers to their Own Devices during Deindustrialization, 1970-1990 -- Conclusion -- Bibliography -- Index
Sommario/riassunto	For working people, the expenses of going to their jobs, in terms of time and cost, are a crucial aspect of daily life. As economic conditions and mobility systems changed in the twentieth century, this aspect of workers' lives underwent significant transformations. Historians have only begun to unravel how power and social inequality informed the governance of everyday mobility. Amid the turmoil of twentieth century economic booms and busts, war and austerity, and processes of (car-centered) suburbanization, how did low-income, rural, and migrant workers get to work in the Netherlands? Governing Workers' Mobility explores the political choices underlying workers' daily commute. Using archival collections, it uncovers the shaping role of workers and employers, detailing their understanding and response to past mobility

barriers. It discusses workers' discovery of bicycles, buses, mopeds, and cars; highlights company efforts to support and control employees' mobility; and shows that today's predicaments have a longer history.
