

1. Record Nr.	UNISA996485665603316
Titolo	Logic programming and nonmonotonic reasoning : 16th international conference, LPNMR 2022, Genova, Italy, September 5-9, 2022, proceedings // Georg Gottlob, Daniela Incezan, Marco Maratea (editors)
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	3-031-15707-9
Descrizione fisica	1 online resource (536 pages)
Collana	Lecture notes in computer science. Lecture notes in artificial intelligence ; ; Volume 13416
Disciplina	005.115
Soggetti	Logic programming Nonmonotonic reasoning
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Organization -- Abstracts of Invited Talks -- DLV Evolution from Datalog to Ontology and Stream Reasoning -- Reward Machines: Formal Languages and Automata for Reinforcement Learning -- Logic-Based Machine Learning: Recent Advances and Their Role in Neuro-Symbolic AI -- Abstract Argumentation with Focus on Argument Claims - An Overview -- Contents -- Technical Contributions -- Syntactic ASP Forgetting with Forks -- 1 Introduction -- 2 Background -- 3 The Cut Operator -- 4 Forgetting into Forks: The Unfolding Operator -- 5 Conclusions -- References -- Modal Logic S5 in Answer Set Programming with Lazy Creation of Worlds -- 1 Introduction -- 2 Background -- 3 S5 Satisfiability Checking Encodings -- 4 Implementation in Answer Set Programming -- 5 Evaluation -- 6 Related Work -- 7 Conclusion -- References -- Enumeration of Minimal Models and MUSes in WASP -- 1 Introduction -- 2 Preliminaries -- 3 Enumeration of Minimal Stable Models -- 4 Enumeration of MUSes -- 5 Experiments -- 6 Related Work -- 7 Conclusions -- References -- Statistical Statements in Probabilistic Logic Programming -- 1 Introduction -- 2 Background -- 2.1 Answer Set Programming -- 2.2 Probabilistic Logic Programming -- 2.3 Credal Semantics -- 2.4

Probabilistic Conditionals -- 3 Probabilistic Answer Set Programming for Statistical Probabilities (PASTA) -- 4 Inference in PASTA -- 5 Experiments -- 6 Related Work -- 7 Conclusions -- References -- A Comparative Study of Three Neural-Symbolic Approaches to Inductive Logic Programming -- 1 Introduction -- 2 Studied Neural-Symbolic Algorithms for ILP -- 3 A Comparison Based on Four Characteristics -- 3.1 Representation of Data -- 3.2 Language Bias -- 3.3 Recursion -- 3.4 Predicate Invention -- 4 Open Challenges and Conclusion -- References -- A Definition of Sceptical Semantics in the Constellations Approach.

1 Introduction -- 2 The Constellations Approach -- 3 Related Work -- 4 The Grounded Semantics of a PrAF -- 5 Further Sceptical Semantics -- 6 Conclusions and Future Work -- References -- SHACL: A

Description Logic in Disguise -- 1 Introduction -- 2 The Wedge -- 3 SHACL, OWL, and Description Logics -- 4 SHACL: The Logical Perspective -- 5 From Graphs to Interpretations -- 6 Related Work and Conclusion -- References -- Tunas - Fishing for Diverse Answer Sets: A Multi-shot Trade up Strategy -- 1 Introduction -- 2 Preliminaries --

2.1 Multi-shot Answer Set Programming -- 2.2 Diverse Solutions -- 3

Iterative Reworking Strategies -- 3.1 Problem Definition and Complexity -- 3.2 Reworking Methods -- 4 Experimental Evaluation -- 5

Conclusion and Future Work -- References -- Emotional Reasoning in an Action Language for Emotion-Aware Planning -- 1 Introduction -- 2

Related Work -- 3 Theoretical Background -- 3.1 Emotion Theories: AE and HER -- 3.2 Action Reasoning and Transition Systems -- 4

Emotional Reasoning -- 4.1 Emotion Decision-Graph (EDG) -- 4.2

Action Language Specifications -- 4.3 Proving Safe Emotional Change

-- 4.4 Example Scenario: Backward Reasoning -- 4.5 Example Scenario:

Forward Reasoning -- 5 Discussion -- 6 Conclusion and Future Work

-- References -- Metric Temporal Answer Set Programming over Timed

Traces -- 1 Introduction -- 2 Metric Temporal Logic -- 3 Translation into Monadic Quantified Here-and-There with Difference Constraints

-- 4 Discussion -- References -- Epistemic Logic Programs: A Study of

Some Properties -- 1 Introduction -- 2 Answer Set Programming and

Answer Set Semantics -- 3 Epistemic Logic Programs and Their

Properties -- 4 Our Observations and Proposal -- 5 Discussion and

Conclusions -- A Epistemic Logic Programs: Useful Properties --

References.

Deep Learning for the Generation of Heuristics in Answer Set

Programming: A Case Study of Graph Coloring -- 1 Introduction -- 2

Background -- 2.1 Graph Coloring Problem -- 2.2 Stable Model Search

-- 2.3 Deep Neural Networks -- 3 Generation of Domain-Specific

Heuristics in ASP -- 3.1 Representation of ASP Instances -- 3.2

Generation of the Training Set -- 3.3 Generation of the Deep Learning

Model -- 3.4 Integration of the Deep Learning Model in wasp -- 4

Experiment -- 5 Related Work -- 6 Conclusion -- References -- A

Qualitative Temporal Extension of Here-and-There Logic -- 1

Introduction -- 2 Preliminaries -- 3 Qualitative Temporal Here-and-

There Logic -- 4 Temporal Tableau Calculus -- 5 Prototypical

Implementation -- 6 Related Work and Conclusion -- References --

Representing Abstract Dialectical Frameworks with Binary Decision

Diagrams -- 1 Introduction -- 2 Background -- 3 Representing ADFs

as BDDs -- 4 Search Space Exploitation: Profiting from BDDs -- 5

Preliminary Experiments -- 6 Conclusions -- References -- Arguing

Correctness of ASP Programs with Aggregates -- 1 Introduction -- 2

Review: Logic Programs via the Many-Sorted Approach -- 2.1 Syntax of

Logic Programs with Aggregates -- 2.2 From Rules to Many-Sorted

First-Order Formulas -- 2.3 Semantics via the SM Operator -- 3

Proving the Correctness of Logic Programs -- 3.1 The Graph Coloring Problem -- 3.2 The Traveling Salesman Problem -- 4 Conclusions and Future Work -- References -- Efficient Computation of Answer Sets via SAT Modulo Acyclicity and Vertex Elimination -- 1 Introduction -- 2 Preliminaries -- 3 Translating ASP into SAT Modulo Graphs/Acyclicity -- 3.1 Normalization -- 3.2 Instrumentation with Acyclicity Constraint -- 3.3 Program Completion Modulo Acyclicity -- 4 Vertex Elimination -- 5 Translating SAT Modulo Acyclicity into Pure SAT -- 6 Translating ASP into Pure SAT.

7 Experimental Evaluation -- 8 Discussion and Conclusion -- References -- IASCAR: Incremental Answer Set Counting by Anytime Refinement -- 1 Introduction -- 2 Preliminaries -- 3 Counting Supported Models -- 3.1 Counting Supported Models Under Assumptions -- 3.2 Compressing Counting Graphs -- 4 Incremental Counting by Inclusion-Exclusion -- 5 Preliminary Empirical Evaluation -- 6 Conclusion and Future Work -- References -- Reasoning About Actions with EL Ontologies and Temporal Answer Sets for DLT -- 1 Introduction -- 2 The Description Logic EL -- 3 Temporal Action Theories in DLT and Temporal Answer Sets -- 4 Combining Temporal Action Theories with EL Ontologies -- 5 Ontology Axioms as State Constraints -- 6 Causal Laws for Repairing Inconsistencies: Sufficient Conditions -- 7 Conclusions and Related Work -- References -- Inference to the Stable Explanations -- 1 Introduction -- 2 The Logical Framework of Defeasible Logic -- 3 Computational Problem and Methodology -- 4 Complexity Results -- 5 Abduction and Theory Change -- 6 Related Work -- 7 Conclusions and Future Investigations -- References -- Semantics for Conditional Literals via the SM Operator -- 1 Introduction -- 2 Syntax of Conditional Programs -- 3 Semantics via the SM Operator -- 4 Semantics via Infinitary Propositional Logic -- 5 Connecting Two Semantics of Conditional Programs -- 6 Arguing Correctness of the K-Coloring Problem -- References -- State Transition in Multi-agent Epistemic Domains Using Answer Set Programming -- 1 Introduction -- 2 Preliminaries -- 3 State Transition Using ASP -- 4 Properties of the State Transition Function -- 5 Example Scenarios -- 6 Related Literature -- 7 Conclusion -- References -- Towards Provenance in Heterogeneous Knowledge Bases -- 1 Introduction -- 2 Provenance Semirings -- 3 Provenance Multi-context Systems -- 4 Grounded Equilibria.

5 Conclusions -- References -- Computing Smallest MUSes of Quantified Boolean Formulas -- 1 Introduction -- 2 Preliminaries -- 3 Smallest Strong Explanations -- 4 On Complexity of Computing Smallest MUSes of QBFs -- 5 Computing Smallest MUSes via Implicit Hitting Sets -- 6 Empirical Evaluation -- 7 Conclusions -- References -- Pinpointing Axioms in Ontologies via ASP -- 1 Introduction -- 2 Preliminaries -- 3 Reasoning Through Rules -- 4 Axiom Pinpointing Through ASP -- 5 Conclusions -- References -- Interlinking Logic Programs and Argumentation Frameworks -- 1 Introduction -- 2 Preliminaries -- 3 Linking LP and AF -- 3.1 From AF to LP -- 3.2 From LP to AF -- 3.3 Bidirectional Framework -- 4 Applications -- 4.1 Deductive Argumentation -- 4.2 Argument Aggregation -- 4.3 Multi-context System -- 4.4 Constrained Argumentation Frameworks -- 5 Complexity -- 6 Concluding Remarks -- References -- Gradient-Based Supported Model Computation in Vector Spaces -- 1 Introduction -- 2 Background -- 3 Representing Logic Programs with Matrices -- 3.1 Relationship Between Positive Forms and Supported Models -- 3.2 Matrix Encoding of Logic Programs -- 4 Gradient Descent for Computing Supported Models -- 4.1 Computing the TP Operator in Vector Spaces -- 4.2 Loss Function for Computing Supported Models

-- 5 Experiments -- 5.1 N-negative Loops -- 5.2 Choose 1 Out of N --
5.3 Random Programs -- 6 Conclusion -- References -- Towards
Causality-Based Conflict Resolution in Answer Set Programs -- 1
Introduction -- 2 Preliminaries -- 3 Causality-Based Conflict
Resolution -- 3.1 Conflicts and Inconsistency -- 3.2 Conflict Resolution
-- 4 Strategies for Conflict Resolution -- 4.1 General Satisfaction
Interdependencies -- 4.2 Blocking Rules Using Opposing Rules -- 4.3
Relevant Rule Modification -- 5 Related Work -- 6 Conclusion and
Future Work -- References.

xASP: An Explanation Generation System for Answer Set Programming.
