

1. Record Nr.	UNISA996495161403316
Titolo	Handbook of magnetic hybrid nanoalloys and their nanocomposites // Sabu Thomas and Amirsadegh Rezazadeh Nochehdehi, editors
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	3-030-90948-4
Descrizione fisica	1 online resource (1276 pages)
Disciplina	620.1697
Soggetti	Magnetic alloys Nanostructured materials - Magnetic properties Nanostructured materials
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface -- Contents -- About the Editors -- Section Editors -- Contributors -- Part I: Theory, Modeling, and Synthesis -- 1 Nanotechnology and Medical Applications -- Introduction -- Nanomaterials for Drug Delivery and Cancer Therapy -- Gene Delivery-Based Nanomedicine -- Nanomaterial-Based Nanocarriers -- Carbon Nanomaterials -- Functionalized and Non-functionalized Carbon Nanomaterials for Delivery Process -- Magnetic Nanoparticles for Delivery Process -- Metal Nanoparticles for Delivery Process -- Nanomaterials in Tissue Engineering -- Materials Used for Nanostructured Scaffolds -- Electrospun Scaffolds -- Hydrogel-Based Scaffolds -- Nanomaterials Used for Detection -- Nanomaterials for Detection of Pathogens -- Nanomaterials for Detection of Proteins -- Nanomaterials Used in Diagnostics and Therapy -- Future of Nanomedicine -- Conclusion -- References -- 2 Synthesis of Iron-Cobalt Nanoalloys (ICNAs) and Their Metallic Composites -- Introduction -- Formation of ICNAs -- Anisotropy -- Oxidation Mechanism -- Preparation Techniques -- Chemical Methods -- Nanoalloys Formation Mechanism -- Sol-Gel Method -- Hydrothermal Method -- Physical Methods -- Molecular Beam Epitaxy -- Thermal Decomposition -- Mechanical Alloying -- Ball Milling -- Factors Influencing Nanoalloy Formation -- Effect of Temperature -- Effect of

Doping -- Effect of Chemicals and Preparation Conditions -- Characterization Techniques and Resultant Properties -- Structural Studies and Properties -- X-ray Diffraction (XRD) -- X-ray Absorption Spectroscopy (XAS) -- X-ray Photoelectron Spectroscopy (XPS) -- Microscopic Analysis and Properties -- Magnetic Analysis and Properties -- Vibrating Scanning Magnetometer -- SQUID -- Spectroscopic Analysis and Properties -- Electromagnetic Analysis and Properties -- Biological Analysis and Properties -- Metallic Composites of ICNAs.

Conclusion and Future Scope -- References -- 3 Synthesis of Core-Shell Magnetic Nanoparticles -- Introduction -- Core-Shell Nanoparticles (CSNPs) -- Magnetic Nanoparticles (MNPs) and Its Magnetic Behavior -- Functionalization and Surface Coating of MNPs and Core-Shell Nanoparticles -- Synthesis and Applications of Magnetic Core-Shell NPs -- Synthesis of Noble Metal-Coated Magnetic Core-Shell NPs -- Synthesis of Silica-Coated Magnetic Core-Shell NPs -- Synthesis of MIP-Coated Magnetic Core-Shell NPs -- Synthesis of Chitosan-Coated Magnetic Core-Shell NPs -- Synthesis Methods of Core-Shell Magnetic Nanoparticles (CSMNPs) -- Micro-emulsion Synthesis Method -- Thermal Decomposition Method -- Hydrothermal and Solvothermal Synthesis Method -- Co-precipitation Synthesis Method -- Seed-Mediated Growth Method -- Layer-by-Layer Growth Method -- Conclusion -- References -- 4 Synthesis of Cobalt-Based Magnetic Nanocomposites -- Introduction -- Properties of Cobalt and Cobalt-Based Magnetic Materials -- Cobalt -- Cobalt (II,III) Oxide (Co_3O_4) -- Cobalt Ferrite (CoFe_2O_4) -- Synthesis Routes to Cobalt-Based Magnetic Nanocomposites -- Coprecipitation -- Hydrothermal and Solvothermal Approaches -- Carbonization -- The Polyol Method -- Sol-Gel -- Pechini Method -- In Situ Reduction -- In Situ Polymerization -- Interfacial Polymerization -- Ball Milling -- Spin Coating -- Melt Blending -- Other Methods -- Applications of Co-based Magnetic Nanocomposites -- Environmental Remediation -- Electromagnetic Wave Absorption -- Magnetic Hyperthermia -- Magnetic Drug Delivery -- Conclusion -- References -- 5 Synthesis of Cobalt and Its Metallic Magnetic Nanoparticles -- Introduction -- Polyol Method -- Solvent -- Properties -- Synthesis of Magnetic Nanoparticles: The Case of Co and Co-Based Alloy Nanoparticles -- Conclusion -- References.

6 Synthesis of Mn-Based Rare-Earth-Free Permanent Nanomagnets -- Introduction -- Synthesis Methods -- Stoichiometry and Formulations -- Doping -- Phase Diagrams -- MnBi -- MnAl -- MnGa -- MnSb -- Sample Preparation -- Chemical Methods -- Electrodeposition -- Mechanical Methods -- High-Energy Ball Milling -- Low-Energy Mechanical Milling -- Physical Methods -- Atomization -- Arc Melting -- Rapid Solidification Process -- Melt Spinning -- Heat Treatment or Annealing -- Quenching -- Integrated Methods -- Elucidations of Synthesized Mn-Based REFPs -- Size, Shape, and Composition -- Purity and Strain -- Phase Transformation and Composition -- Magnetic Properties -- Conclusion -- References -- 7 Synthesis of Magnetoelectric Multiferroics and Its Composites -- Introduction to Magnetoelectric (ME) Multiferroics -- Classification of ME Multiferroic Materials -- Synthesis Methods of ME Multiferroics -- Synthesis Methods of Single-Phase and Composite Multiferroics -- Molten Salt Synthesis (MSS) -- Solgel Method -- Solid-State Reaction Method -- Hydrothermal or Solvothermal Method -- Sonochemical Method -- Solution Combustion Method -- Synthesis of Multiferroics and Composites by Thin Film Deposition Techniques -- PLD -- Sputtering -- MBE -- MOCVD -- ALD -- Conclusion -- References -- 8 Synthesis

of Magnetic Carbon Nanotubes and Their Composites -- Introduction -- Classification, Morphology, Structure, and Properties of CNTs -- Structure and Morphology of CNTs -- Classification of CNTs -- Single-Walled Carbon Nanotubes (SWCNTs) -- Multi-walled Carbon Nanotubes (MWCNTs) -- Properties of CNTs -- Mechanical Properties -- Electrical Properties -- Thermal Properties -- Chemical Properties -- Optical Properties -- Magnetic Nanoparticles -- Synthesis Methods for Magnetic CNTs and Their Composites -- Template-Based Synthesis -- Self-Assembly Method.

Hydrothermal/Solvothermal Processes -- Filling Process -- Chemical Vapor Deposition (CVD) -- Pyrolysis Method -- Sol-Gel Process -- Electrochemical Routes -- Electrospinning -- Co-precipitation -- Sonochemical Method -- Reverse Microemulsion Method -- Arc Discharge Technique -- Detonation-Induced Reaction -- Pulsed Laser Ablation Approach -- Applications of Magnetic CNTs and Their Composites -- Environmental Remediation -- Electrochemical Nanobiosensors -- Catalysis -- Separation or Identification of Biomolecules -- Drug Delivery and Disease Diagnosis -- Electrochemical Energy Conversion and Storage -- Conclusion -- References -- 9 Chiral Magnetic Nanocomposite Particles: Preparation and Chiral Applications -- Introduction -- Preparation of CMNPs -- Small Organic Molecules -- Amino Acids -- Cyclodextrins -- Others -- Macromolecules -- Biomacromolecules -- Synthetic Polymers -- Metal Complexes -- Chiral Applications -- Asymmetric Catalysis -- Chiral Separation -- Chiral Discrimination -- Concluding Remarks -- References -- 10 Manufacturing Techniques of Magnetic Polymer Nanocomposites -- Introduction -- Nanocomposite Materials -- Polymer Nanocomposite Materials -- Magnetic Polymer Nanocomposites -- The Core-Shell Nanocomposites -- The Self-Assembled Colloidal Nanocomposites -- Organic-Inorganic Nanocomposites -- Manufacturing Techniques of Magnetic Polymer Nanocomposites -- Conclusion -- References -- 11 Vacuum-Based Deposition Techniques to Synthesize Magnetolectric Multiferroic Materials -- Introduction -- Basics of Thin Film Growth -- Vacuum Based Deposition Techniques -- Molecular Beam Epitaxy -- Fundamentals of MBE Instrument -- Pulsed Laser Deposition -- Photon Absorption Followed by Creation of Plasma and Ablation of the Target Material -- Dynamics of Plasma -- Deposition of the Ablated Materials on the Substrate.

Nucleation and Growth of a Thin Film on the Substrate Surface -- Sputtering -- Conclusion and Future Outlook -- References -- 12 Advanced Progress in Magnetolectric Multiferroic Composites -- Introduction -- Magnetolectric Materials and Operating Mechanisms -- Strain-Mediated Magnetolectric Compounds -- Charge Carriers-Mediated Magnetolectric Compounds -- Exchange-Mediated Magnetolectric Compounds -- Aspects Influencing Magnetolectric Coupling in Compounds -- Interfacial Connection and Phase Connectivity -- Type of Materials and Their Properties -- Magnetolectric Composites -- Magnetolectric Hexaferrites -- ME in Y-Type Hexaferrites -- ME in Z-Type Hexaferrites -- ME in M-Type Hexaferrites -- ME in Other Types of Hexaferrites -- Synthesis of Magnetolectric Materials -- Zero-Dimensional (Nanoparticles) -- One-Dimensional (Wires, Fibers, Tubes, etc.) -- Two-Dimensional (Thick or Thin Films) -- Characterization Procedures for Magnetolectric Coupling Measurements -- Dynamic Mode Based on Lock-in Program -- Piezoresponse Force Microscopy -- Applications of Magnetolectric Materials -- Magnetic Field Sensors -- Electric Current Sensors -- Energy Harvesting -- Random Access Memory-Based Magnetolectric

Materials -- Magnetolectric Antenna -- Spintronics Devices Based on ME Effect -- Giant Magnetoresistance -- Tunnel Magnetoresistance -- Applications of Magnetolectric Materials in Biomedicine -- Toxicity of Magneto-Electric Nanocomposites Toward Technological and Biological Applications -- Toxicity of Magnetolectric Materials and Their Impact on the Environment, Users' Health, and Technological Applications -- Toxicity Valuation of Magnetolectric Materials in Biomedical Applications -- Conclusion and Future Challenges -- References -- 13

Surface Modification of Magnetic Hybrid Nanoalloys -- Introduction -- Magnetic Hybrid Nanoalloys (MHNAs).
Surface Modification of MHNAs.
