

1. Record Nr.	UNISA996495170303316
Titolo	Nonlinear analysis, geometry and applications : proceedings of the Second NLAGA-BIRS Symposium, Cap Skirring, Senegal, January 25-30, 2022 // Diaraf Seck [and three others], editors
Pubbl/distr/stampa	Cham : , : Springer, , [2022] ©2022
ISBN	3-031-04616-1
Descrizione fisica	1 online resource (525 pages)
Collana	Trends in Mathematics
Disciplina	515
Soggetti	Mathematical analysis Nonlinear functional analysis Anàlisi funcional no lineal Anàlisi matemàtica Congressos Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Contents -- Stability Analysis and Uniform Persistence of the Dynamics of Cytotoxic Cells with Crowley-Martin Functional Response -- 1 Introduction -- 2 Model of Cytotoxic Cells -- 3 Dynamic Properties -- 3.1 Existence and Determination of Equilibrium Points -- 3.2 Uniform Persistence of the Disease -- 3.3 Stability Analysis of Equilibrium Points -- 4 Numerical Simulations -- 5 Conclusion and Perspectives -- Appendix -- References -- Null Controllability by Birth Control for a PopulationDynamics Model -- 1 Introduction and Mains Results -- 2 Proof of Theorem 1.1 (Step 1) -- 2.1 Proof of the Proposition 2.2 -- 2.2 Proof of the Step 1 of the Theorem 1.1 -- 3 Proof of Theorem 1.1 (Step 2) -- 4 Proof of the Theorem 1.1 (Step 3): Large Time Null Controllability -- 5 Proof of the Theorem 1.2: Non Existence of Control -- 6 Numerical Simulations -- 6.1 Discretization of the Controlled System -- 6.2 Simulations of the Controlled System and Comments -- 7 Conclusion -- References -- Aedes Vertical Transmission Logistic Growth Mathematical Model for

Assessing Arboviruses Maintenance in Environment: A Positive Semigroup Approach -- 1 Introduction -- 2 Preliminaries Results of the Model -- 2.1 Semilinear Cauchy Problem of the Model -- 2.2  $R_0$  Formula and Asymptotic Behavior of the Homogeneous Cauchy Problem -- 3 Solution and Asymptotic Behaviors of the Model -- References -- Global Dynamics of a Spore Producing Pathogens Epidemic System with Nonlocal Diffusion Process -- 1 Introduction -- 2 Main Results -- 2.1 Existence, Dissipativity, and Compactness of the Semiflow -- 2.2 Pathogen Invasion Process in Uninfected Environment and Threshold Dynamics -- 3 Numerical Simulations and Discussion -- 3.1 Description of the Model Numerical Simulation -- 3.2 Discussion -- 4 General Remarks -- 5 Proof of Theorem 2.2 -- 6 Proof of Theorem 2.4.7 Proof of Theorem 2.5 -- 7.1 Proof of Theorem 2.5(i) -- 7.2 Technical Materials and Uniform Persistence -- 7.3 Proof of Theorem 2.5(ii) -- Appendix A: Proof of Claim 7.4 -- References -- Stochastic Reaction Network Modeling and Optimal Control for Covid-19 -- 1 Introduction -- 2 Modeling -- 3 Optimal Control Problem -- 3.1 Study of Stochastic Differential Equation -- 3.2 Position of the Problem -- 3.3 Dynamic Programming Principle -- 3.4 Existence and Uniqueness of the HJB Equation -- 4 Numerical Simulation -- 4.1 Numerical Scheme -- 4.2 Covid19 Case Study: SDE -- 4.3 Covid19 Case Study: The Optimal Control Problem -- 5 Discussion -- 6 Conclusion -- References -- Bayesian Selection of Adaptive Bandwidth in Non-homogeneous Poisson Process Kernel Estimators for the Intensity Function -- 1 Introduction -- 2 Bayesian Adaptive Bandwidth Selector -- 2.1 Prior Choice for  $h_{ij}$  -- 2.2 Choice for Prior Parameter -- 2.3 Posterior Distribution and the Bayes Estimators -- 3 Simulation -- 3.1 Simulations Results -- 3.2 An Application to Real Data -- 4 Conclusion -- References -- Nonnegative Matrix Factorization and Log-Determinant Divergences -- 1 Introduction -- 2 Nonnegative Matrix Factorization (NMF) and Multiplicative Algorithms -- 3 Basic Alpha-Beta Logarithm Determinant Divergence -- 4 Main Results -- 4.1 The Alpha Beta Log-Det Divergence -- 4.2 Special Cases of the AB Log-Det Divergences and Distances -- 4.3 New Measures of AB-Log-Det Divergence -- 4.4 Potentiality AB Log-Det Divergence -- 4.5 Algorithms for NMF Based on the AB-Log-Det Divergence -- 4.5.1 Algorithm Multiplicative Based on the AB-Log-Det Divergence -- 4.5.2 Conditions for Monotonic Descent of AB-Log-Det Divergence -- 5 Applications -- 5.1 Efficient Similarity for Covariance Matrices via the NMF Jensen-Bregman Log-Det Divergence. 5.1.1 Derivation of Multiplicative Algorithms for NMF Based on the Jensen-Bregman-Log-Det Divergence and the DR -- 5.1.2 Computational Advantages -- 5.2 Alpha-Beta-Log Det Divergence Applied to Spatial Filtering -- 5.3 Restoration of Musical Spectrograms -- 6 Conclusion -- References -- Study of the Shallow Water Equations with Variable Bathymetry in a Channel with Flather Open Boundary Condition -- 1 Introduction -- 2 Model -- 2.1 Description of the Model -- 2.2 Model Equations -- 2.3 Boundary Conditions -- 2.4 Initial Conditions -- 3 Mathematical Analysis of the Model -- 3.1 Temporal Discretization of the Model -- 3.2 Mixed Variational Formulation -- 3.3 Mixed Finite Element Approximation of Velocity Field and Free Surface Elevation -- 3.3.1 Discrete Mixed Formulation -- 3.3.2 Study of the Discrete Solution -- 4 Numerical Results -- 4.1 Numerical Simulation -- 4.2 Results -- 5 Conclusion -- References -- Almost Periodic Solution for Non Autonomous Non Densely Defined Cauchy Problems -- 1 Introduction -- 2 Preliminaries -- 3 Existence of Almost Periodic Solution -- 3.1 Almost Periodic Functions -- 3.2 Almost Periodic Solutions of the Inhomogeneous Problem -- 3.3 Almost Periodic

Solutions of the Semilinear Problem -- 4 Example -- References --  
 Homogenization of a Parabolic Equation with Random Coefficients: An  
 Application to Sand Transport Equations -- 1 Introduction -- 1.1  
 Results -- 1.2 On the Stochastically Two Scale Convergence in the  
 Mean -- 2 Existence and Estimates, Proof of Theorem 1.1 -- 3  
 Stochastically Two-Scale Mean Convergence -- References --  
 Uniqueness and Stability in an Inverse Problem for Electromagnetic  
 Forming of a Metal Jet -- 1 Introduction -- 2 Study of the Shape  
 Optimization Problem -- 2.1 Auxiliary Results -- 2.2 Position of the  
 Problem -- 2.3 Existence of Solution of Shape Optimization Problem.  
 3 Optimality Condition of the Problem -- 3.1 Preliminaries -- 3.2  
 Derivation with Respect to the Domain -- 3.3 Results of the Optimality  
 Condition -- 4 Uniqueness and Stability of the Solution -- 4.1 Stability  
 on the Border of the Solution -- 4.2 Stability of the Solution -- 4.3  
 Uniqueness of the Solution -- 5 Identification of the Optimal Shape --  
 6 Conclusion and Perspectives -- References -- Numerical and  
 Theoretical Analysis for Optimal Shape Inverse Problems -- 1  
 Introduction -- 2 Shape Derivative Using the Lagrangian and Minimax  
 Methods -- 2.1 Shape Derivative -- 3 Numerical Method Based on  
 Polynomial Deformation -- 3.1 Numerical Illustrations by Translation  
 -- 3.1.1 Description of the Proposed Algorithm -- 3.1.2 Numerical  
 Illustrations -- 3.2 Numerical Illustrations by Parabolic Deformation --  
 3.2.1 Description of the Proposed Algorithm -- 3.2.2 Numerical  
 Illustrations -- 4 Numerical Method by a General Geometric  
 Deformation with a Shape Optimisation Problem -- 4.1 Shape  
 Derivative Using the Vector Field Method -- 4.2 The Augmented  
 Lagrangian Algorithm for Equality-Constrained Problems -- 4.3  
 Regularization of the Shape Gradient -- 4.4 Some Illustrations: Initial  
 Domains -- 4.5 Description of the Proposed Algorithm -- 4.6  
 Numerical Illustrations -- References -- Algorithms for Nonlinear  
 Integral Equations of Hammerstein Type with  $\Phi$ -monotone Mappings  
 in Certain Banach Spaces -- 1 Introduction -- 2 Preliminaries -- 3  
 Convergence in  $L^p$ ,  $L^p$  and  $W^{m,p}$ -spaces,  $1 < p < 2$  -- 4  
 Convergence in  $L^p$ ,  $L^p$  and  $W^{m,p}$ -Spaces,  $2p < 2$  -- -- References --  
 A Riemannian Point of View for a Quadrature Surface Free Boundary  
 Problem -- 1 Introduction -- 2 Position of the Problem and Main  
 Results -- 3 Geometric Tools and Preliminary Results -- 4 Proofs of the  
 Main Results -- References -- A Study of Sharp Coefficient Bounds for  
 a New Subfamily of Starlike Functions.  
 1 Introduction, Definitions and Preliminaries -- 2 A Set of Lemmas -- 3  
 Coefficient Inequalities for the Function Class  $\text{Star}_h$  -- 4 The Third  
 Hankel Determinant -- 5 Concluding Remarks and Observations --  
 References -- Resolution of  $\bar{\partial}$  for Differential Forms with Boundary  
 Value in the Sense of Currents Defined on a Half Space of  $C^n$  -- 1  
 Introduction -- 2 Preliminaries -- 3 Resolution of  $\bar{\partial}$  for the Differential  
 Forms with Boundary Value in the Sense of Currents -- 4 Resolution of  
 $\bar{\partial}$  for Differential Forms with Boundary Value in the Sense of Currents  
 -- References -- Certain Contributions to the  $\bar{\partial}$ -Problem -- 1  
 Introduction -- 2 Solving  $\bar{\partial}$  with a Support Condition -- 2.1  $L^p$ -Scale --  
 2.2  $L^p$ -Theory for  $\bar{\partial}$  on  $C^n$  -- 2.3  $C^k$ -Setting -- 2.4 Applications --  
 2.4.1  $L^p$ -Extension Theorem -- 2.4.2 Holomorphic Approximation -- 3  
 Regularity with Gain for  $\bar{\partial}$  -- 3.1 Raising Steps Methods -- 3.2  $L^p$ - $L^r$ -  
 Estimates -- 3.3  $L^p$ -Regularity for  $\bar{\partial}$  on Products -- 4 The  $\bar{\partial}$ -Problem --  
 4.1  $L^2$ -Estimates for  $\bar{\partial}$  -- 4.2 Hölder and  $L^p$ -Sobolev Estimates for  $\bar{\partial}$  --  
 5 Open Problems -- References -- Self-intersection on Pair of Pants --  
 1 Introduction -- 2 Coding Closed Geodesics -- 2.1 Coding of the  
 Limit Set -- 2.2 Representation of Geodesics -- 3 Self-intersection of  
 Closed Geodesic -- 3.1 Cyclically Lexicographical Ordering -- 3.2 Self-

intersection and Coding -- 3.3 Calculation of the Number of Self-intersections of a Closed Geodesic -- 4 Proof of Theorems 1.1 and 1.2 -- 5 Proof of Theorem 1.3 -- References -- On the Closure of Irregular Orbits of the Horocyclic Flow -- 1 Introduction -- 2 Preliminaries -- 2.1 Horocyclic Convergence -- 2.2 Asymptotic Finiteness -- 3 Proof of the Theorem 1.2 -- References -- Central Extensions and Hom-Quadratic Hom-Novikov Color Algebras -- 1 Introduction -- 2 Preliminaries -- 3 Generalities on Hom-Novikov Color Algebras -- 4 Constructions of Hom-Novikov Color Algebras.  
4.1 From Linear Map, Morphism and Centroid.
