| 1. Record Nr. | UNISA996495770603316 |
| Autore | Deniz Toktay Hazel |
| Titolo | Modeling of Archaeomagnetic Anomaly Maps [[electronic resource] /] / by Hazel Deniz Toktay |
| Pubbl/distr/stampa | Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2022 |
| ISBN | 9789811942198 9789811942181 |
| Edizione | [1st ed. 2022.] |
| Descrizione fisica | 1 online resource (112 pages) |
| Collana | SpringerBriefs in Mathematical Methods, , 2365-0834 |
| Disciplina | 930.1 |
| Soggetti | Mathematics Archaeology Mathematics - Data processing Applications of Mathematics Computational Mathematics and Numerical Analysis Geofísica Arqueologia Anomalies magnétiques Models matemàtics Llibres electrònics |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Nota di contenuto | Auxiliary Materials -- Historical Background -- Detection Of Inclination And Declination Angles From Total Magnetic Anomaly Maps On Archaeological Sites -- Quantitative Analysis Of Total Magnetic Anomaly Maps On Archaeological Sites -- Quantitative Analysis Of Total Magnetic Anomaly Maps On Archaeological Sites. |
| Sommario/riassunto | This book deals with magnetic anomaly maps and their properties. These properties are essential to modeling the elimination of the uncertainty problem of buried archaeological structure locations and depths. To this end, several models are presented and their quantitative properties are studied. Numerical simulations have been created, confirming theoretical results that were obtained. |
